KUMARAGURU COLLEGE OF TECHNOLOGY

(Autonomous Institution Affiliated to Anna University, Chennai)

COIMBATORE – 641049

CURRICULUM & SYLLABUS
CHOICE BASED CREDIT SYSTEM
(REGULATIONS 2020)

I to IV Semester

MCA

Department of Computer Applications

MASTER OF COMPUTER APPLICATIONS (2 YEARS)

VISION

The Department,

- Seeks to create academic programs and a campus culture that imbibes a socially committed professionalism which would in turn feed into the overall development of the society and make global citizens and leaders out of the students.
- Aims to become a highly recognized, research driven department with good infrastructure, developing industry ready products.

MISSION

- The Department is committed to set standards of excellence in its academic programmes by enabling its students to achieve a blending of knowledge acquisition and applications of such knowledge in real life situations.
- It is also aimed to equip them to adapt themselves to changing global and local needs upholding professional ethics and contribute their might in transforming India into a world leader in technological advancement and prosperity.

PROGRAMME EDUCATIONAL OBJECTIVES (PEOs):

PEOs for MCA programme are designed based on the department mission.

- To prepare students to transact in the field of computer applications by providing technical foundations in the field of computer applications.
- To prepare students to intellect in computing skills and innovation of software products to meet the industry needs.
- To provide exposure to cutting edge technologies and training to work on multidisciplinary. projects in a team.
- To prepare students to life-long learning through professional activities; adapt themselves with ease to new technologies, while exhibiting ethical and professional standards.

PROGRAM OUTCOMES (PO'S):

On successful completion of the program:

1. **Computational Knowledge**: Apply knowledge of computing fundamentals, computing specialization, mathematics, and domain knowledge appropriate for the computing specialization to the abstraction and conceptualization of computing models from defined problems and requirements.

2**. Problem Analysis:** Identify, formulate, research literature, and solve complex computing problems reaching substantiated conclusions using fundamental principles of mathematics, computing sciences, and relevant domain disciplines.

3. **Design /Development of Solutions:** Design and evaluate solutions for complex computing problems, and design and evaluate systems, components, or processes that meet specified needs with appropriate consideration for public health and safety, cultural, societal, and environmental considerations.

4. **Conduct Investigations of Complex Computing Problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

5. **Modern Tool Usage:** Create, select, adapt and apply appropriate techniques, resources, and modern computing tools to complex computing activities, with an understanding of the limitations.

6. **Professional Ethics:** Understand and commit to professional ethics and cyber regulations, responsibilities, and norms of professional computing practice.

7. **Life-long Learning:** Recognize the need, and have the ability, to engage in independent learning for continual development as a computing professional.

8. **Project management and finance :** Demonstrate knowledge and understanding of the computing and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

9. **Communication Efficacy:** Communicate effectively with the computing community, and with society at large, about complex computing activities by being able to comprehend and write effective reports, design documentation, make effective presentations, and give and understand clear instructions.

10. **Societal and Environmental Concern:** Understand and assess societal, environmental, health, safety, legal, and cultural issues within local and global contexts, and the consequential responsibilities relevant to professional computing practice.

11. **Individual and Team Work:** Function effectively as an individual and as a member or leader in diverse teams and in multidisciplinary environments.

12. **Innovation and Entrepreneurship:** Identify a timely opportunity and using innovation to pursue that opportunity to create value and wealth for the betterment of the individual and society at large.

REGULATION 2020

MCA CURRICULUM

SEMESTER I							
Course Code	**Course Title**	**Course Mode**	**L**	**T**	**P**	**J**	**C**
P20CAT1001	Data Structures and Algorithms	Theory	3	0	0	0	3
P20CAT1002	Database Technologies	Theory	3	0	0	0	3
P20CAT1103	Advanced Operating Systems	Theory	3	1	0	0	4
P20CAT1004	Programming with JAVA	Theory	3	0	0	0	3
P20MAT1101	Probability and Statistics for Data Analysis	Theory	3	1	0	0	4
P20CAP1501	Database Technologies Laboratory	Lab	0	0	4	0	2
P20CAP1502	Data Structures Lab using C	Lab	0	0	4	0	2
P20CAP1503	Programming with Java Lab	Lab	0	0	4	0	2
						Total Credits	**23**
						Total Hours Per Week	**29**

SEMESTER II							
Course Code	**Course Title**	**Course Mode**	**L**	**T**	**P**	**J**	**C**

Department of Computer Applications

Regulations 2020

MCA SYLLABUS

SEMESTER – I

P20CAT1001	DATA STRUCTURES AND ALGORITHMS	L	T	P	J	C
		3	0	0	0	3

Course Outcomes

After successful completion of this course, the students should be able to

CO1: Analyze the performance of algorithms.
CO2: Apply the knowledge of basic data structures and their implementations.
CO3: Develop skills in applying linear and nonlinear data structures.
CO4: Apply different algorithmic design strategies.
CO5: Understand the concepts of P and NP classes

Pre–requisite : Nil

COURSE ASSESSMENT METHODS
DIRECT
1. Continuous Assessment Test I, II 2. Assignment 3. Demonstration etc (as applicable) 4. End Semester Examination
INDIRECT
1.Course-end survey

ALGORITHM ANALYSIS — **7 Hours**

Fundamentals of Algorithm Problem Solving- Fundamentals of Analysis of Algorithm – Efficiency – Analysis Framework - Asymptotic Notations – Mathematical Analysis of Recursive and Non–recursive Algorithms– Analysis of Algorithms – Time complexities.

ARRAYS AND LINKED LIST — **9 Hours**

Arrays- Representation – Operations on Arrays – Linked List- Basic Concepts and Operations- Types of Linked List : Doubly Linked List – Singly Linked List – Stack : Definition – Operations on Stack – Static and Dynamic Implementation of a Stack – Recursion using Stack - Definition – Operations on Queue – Static and Dynamic Implementation of a Queue.

GRAPHS — **10 Hours**

Introduction –Terminology - Representation of Graph - Graph Traversals: Depth-first and Breadth-first Traversal - Applications of Graphs – Transitive Closure :Warshall's Algorithm -Shortest-path Algorithms :Dijkstra's Algorithm – Floyd's Algorithm - Minimum Spanning Tree – Prim's and Kruskal's Algorithms.

TREES — **6 Hours**

Trees – Introduction - Binary Search Tree (BST) : Introduction -Operations– B – Trees :Definition, Operations.	
DESIGN STRATEGIES	**9 Hours**
Divide and Conquer - Introduction – Quick Sort- Merge Sort - Binary Search – Analysis- Backtracking: Introduction - n–Queens Problem – Hamiltonian Circuit Problem – Branch and Bound: Introduction – Assignment Problem – Knapsack Problem.	
COMPUTABILITY	**4 Hours**
P, NP, NP-complete and NP-hard.	
Theory: 45 Hours **Tutorial: -**	**Total : 45 Hours**

P20CAT1002	DATABASE TECHNOLOGIES	L	T	P	J	C
		3	0	0	0	3

Course Outcomes

After successful completion of this course, the students should be able to

CO1: Use the techniques, components and tools of a typical database management system.
CO2: Understand basic database concepts, including the structure and operation of the relational data model.
CO3: Demonstrate the different types of database implementation concepts.
CO4: Understand the emerging database technologies.
CO5: Familiarize with NoSQL concepts.

Pre–requisite : Nil

COURSE ASSESSMENT METHODS
DIRECT
1. Continuous Assessment Test I, II 2. Assignment 3. Demonstration etc (as applicable) 4. End Semester Examination
INDIRECT
1. Course-end survey

INTRODUCTION	**9 Hours**
Introduction – Database Architecture – Structure of Relational Databases – Database Schema – Schema Diagrams – Relational Query Languages – Keys – Basic Structure of Queries and SQL Operations – Integrity Constraints – ER Model.	
DATABASE DESIGN	**9 Hours**
Relational Database Design – First Normal Form – Second Normal Form – Third Normal Form Boyce - Codd Normal Form – Case Study: Normalization Process – Front end and Back end – MySQL – Connectivity using ODBC/JDBC.	
DATABASE IMPLEMENTATION	**9 Hours**
Physical Database Design and Tuning – Database Transaction: Transaction Concept and State – Concurrency Control: Two-Phase locking protocol – Recovery: Failure Classification – Log Based Recovery – Shadow Paging.	
EMERGING TECHNOLOGIES AND APPLICATIONS	**9 Hours**
Active Database Concepts and Triggers – Distributed Databases: Concepts – Database Design and Types – Database Applications in Mobile Communication – Multimedia Databases – Genome Data Management.	
NoSQL	**9 Hours**

Introduction – Aggregate Data Model – Distribution Model – NoSQL Implementation: Key Value Database – Document Database – MongoDB.
Theory: 45 Hours **Tutorial: -** **Total : 45 Hours**

P20CAT1103	ADVANCED OPERATING SYSTEMS	L	T	P	J	C
		3	1	0	0	4

Course Outcomes

After successful completion of this course, the students should be able to

CO1: Know the basic concepts of operating systems.

CO2: Understand process management, synchronization and deadlock concepts.

CO3: Analyze various memory management techniques and disk scheduling algorithms.

CO4: Demonstrate file system, Allocation Methods and Free space management.

CO5: Understand Virtualization.

CO6: Compare various mobile operating System

Pre–requisite: Nil

COURSE ASSESSMENT METHODS
DIRECT
1. Continuous Assessment Test I, II 2. Assignment 3. Demonstration etc (as applicable) 4. End Semester Examination
INDIRECT
1.Course-end survey

INTRODUCTION	**9 Hours**
Operating System - Operating System Structure – Operations – Process Management – Memory Management-Secondary Storage Management – Protection and Security – Open Source Operating System – Operating System Services – User Interface – System Calls – System Programs – Design and Implementation – Debugging.	

PROCESS MANAGEMENT	**8 Hours**
Process Concepts – Process Scheduling – Operations on Processes – Inter Process Communication – Examples – Threads – Overview – Multi Threading Models – Libraries – Issues.	

PROCESS SYNCHRONIZATION	**7 Hours**
Background – Critical Section Problem – Peterson's Solution – Synchronization Hardware – Semaphores – Classic Problem of Synchronization – Monitors.	

CPU SCHEDULING	**6 Hours**
Basic Concepts – Scheduling Criteria – Scheduling Algorithms - Problems	

DEADLOCK	**6 Hours**
Deadlock Characterization – Handling Deadlocks – Deadlock Prevention – Avoidance – Detection – Recovery.	

MEMORY MANAGEMENT	**6 Hours**
Background – Swapping – Contiguous Memory Allocation – Paging – Structure of the Page Table – Segmentation -Virtual Memory Management - Background – Demand Paging – Copy on Write – Page Replacement – Thrashing – Working Set.	
I/O MANAGEMENT, DISK SCHEDULING AND FILE MANAGEMENT	**5 Hours**
Organization of I/O function – Evolution of I/O Function – Types of I/O devices – Logical Structure of I/O Functions – I/O Buffering – Disk I/O – Disk Scheduling Algorithms – Disk Cache. File Concept – Access Methods-Free Space management	
VIRTUAL MACHINES	**4 Hours**
System Model – Implementation of Virtual Machines- Benefits and Features - Building Block - Types of Virtual Machines - Virtualization and Operating-System Components.	
CASE STUDY	**9 Hours**
Linux System - Design Principles, Kernel Modules, Process Management, Scheduling, Memory Management, Input-Output Management, File System, Inter-process Communication; Mobile OS - iOS and Android - Architecture and SDK Framework, Media Layer, Services Layer, Core OS Layer. File System- Google File System-OceanStore.	
-	
Theory: 45 Hrs **Tutorial: 15 Hrs**	**Total Hours: 60 Hrs**

P20CAT1004	PROGRAMMING WITH JAVA	L	T	P	J	C
		3	0	0	0	3

Course Outcomes

After successful completion of this course, the students should be able to

CO1: Apply the fundamental core java, packages, data base connectivity for computing.
CO2: Implement Java programs.
CO3: Make use of hierarchy of Java classes to provide a solution to a given set of requirements.
CO4: Use the frameworks JSP, Hibernate, Spring.
CO5: Design and implement server-side programs using Servlets and JSP.

Pre–requisite **:** Nil

COURSE ASSESSMENT METHODS
DIRECT
1. Continuous Assessment Test I, II 2. Assignment 3. Demonstration etc (as applicable) 4. End Semester Examination
INDIRECT
1.Course-end survey

JAVA FUNDAMENTALS	**9 Hours**

Java features – Java Platform – Java Fundamentals – Expressions, Operators, and Control Structures – Classes, Methods – Inheritance - Packages and Interfaces – Boxing, Unboxing – Variable- Length Arguments (Vararg), Exception Handling.

COLLECTIONS AND ADVANCE FEATURES	**9 Hours**

Utility Packages- Introduction to Collection –Hierarchy of Collection Framework – Generics, Array list, LL, HashSet, Tree-set, HashMap – Comparators – Java annotations – Pre-main method.

ADVANCED JAVAPROGRAMMING	**9 Hours**

Input Output Packages – Inner Classes – Java Database Connectivity - Introduction JDBC Drivers - JDBC Connectivity with MySQL/Oracle -Prepared Statement and Result Set – JDBC Stored Procedures Invocation - Servlets - RMI – Lambda Expressions.

OVERVIEW OF DATA RETRIEVAL AND ENTERPRISE APPLICATION DEVELOPMENT	**8 Hours**

Tiered Application development - Java Servers, Containers –Web Container – Creating Web Application using JSP/Servlets – Web Frameworks- Introduction to Spring and Spring Boot- Play Framework – ORM Layer – Introduction to Hibernate.

JAVA INTERNALS AND NETWORKING	**10 Hours**
Java Jar Files-Introspection – Garbage Collection – Architecture and Design – GC Clean up Process, Invoking GC, Generation in GC - Networking Basics Java and the Net – Inet Address – TCP/IP Client Sockets – URL –URL Connection – TCP/IP Server Sockets – A Caching Proxy HTTP Server – Datagrams.	
Theory: 45 Hours **Tutorial: -** **Total : 45 Hours**

P20MAT1101	PROBABILITY AND STATISTICS FOR DATA ANALYSIS	L	T	P	J	C
		3	1	0	0	4

Course Outcomes

After successful completion of this course, the students should be able to

CO1: Understand about data collection, represent data graphically using bar chart and pie chart. and compute various measures of central tendency and dispersion for analysis of data.

CO2: Interpret the correlation between variables and predict unknown values using regression.

CO3: Explore random variables and predict probabilities for situations following normal distribution.

CO4: Perform hypothesis testing using large sample tests and Chi square test and interpret the results, which will form the basis for data analysis.

CO5: Understand the principles of design of experiments and perform analysis of variance.

Pre–requisite : Nil

COURSE ASSESSMENT METHODS

DIRECT

1. Continuous Assessment Test I, II
2. Assignment
3. Assignment based on R Software
4. End Semester Examination

INDIRECT

1.Course-end survey

COLLECTION OF DATA AND STATISTICAL MEASURES	**13+4 Hours**

Collection of Data-Classification-Tabulation-Graphical Representation – Simple Bar Chart – Pie Chart - Measures of Central Tendency: Arithmetic Mean, Median and Mode – Measures of Variation: Range, Quartile Deviation - Standard Deviation and Coefficient of Variation – Five Number Summary – Box Plot Technique.

CORRELATION AND REGRESSION	**7+3 Hours**

Correlation (Discrete Data) – Scatter Diagram - Karl Pearson's Correlation Coefficient – Spearman's Rank Correlation – Regression Lines (Discrete Data).

RANDOM VARIABLES	**11+3 Hours**

Random Variable – Distribution Function – Properties – Probability Mass Function – Probability Density Function – Expectation - Normal Distribution.

TESTING OF HYPOTHESIS	**7+3 Hours**

Testing of Hypothesis for Large Samples (Single Mean, Difference of Means, Single Proportion, Difference of Proportions) - Chi-Square Test for Independence of Attributes.

ANALYSIS OF VARIANCE	**7+2 Hours**
Analysis of Variance (ANOVA) – Completely Randomized Design (CRD) – Randomized Block Design (RBD) – Latin Square Design (LSD).	
Theory: 45 Hours **Tutorial: 15 Hours** **Total: 60 Hours**	
STATISTICAL LAB USING R-PROGRAMMING (Self-Study Mode)	
List of Experiments 1. Introduction, Basic data representation. 2. Data presentation methods - Bar Chart, Pie Chart. 3. Importing data from MS-Excel. 4. Data manipulation 5. Mean, median, mode. 6. Standard deviation, five number summary, box plot. 7. Scatter diagram, correlation.

P20CAP1501	DATABASE TECHNOLOGIES LABORATORY	L	T	P	J	C
		0	0	4	0	2

Course Outcomes

After successful completion of this course, the students should be able to

CO1: Design and implement a database schema for a given problem domain.
CO2: Construct simple and advanced database queries using Structured Query Language (SQL).
CO3: Populate and query a database using TCL/DCL commands.
CO4: Program in PL/SQL including stored procedures, stored functions, cursors and packages.
CO5: Design and build a GUI application using 4GL.

Pre–requisite : Nil

COURSE ASSESSMENT METHODS

DIRECT

1. Pre/Post - Experiment Test/Viva; Experimental Report for each Experiment
2. Model Examination
3. End Semester Examination

INDIRECT

1.Course-end survey

LIST OF EXPERIMENTS:

1. Execute Data Definition Language and Data Manipulation Language commands.
2. Demonstrate Data Control Language and Transaction Control Language commands.
3. Implement Data Query Language.
4. Execute SQL Functions.
5. Evaluate Set Operations.
6. Implement Join Operations.
7. Execute Complex and Sub Queries.
8. Create Database Objects.
9. Execution of PL/SQL Commands.
10. Record Management using Cursors.
11. Construct Functions.
12. Create Triggers.
13. Exercise of nested table using PL/SQL.
14. Develop a Package using Database Connectivity.
15. Exercise using NoSQL Database.

Total Hours: 60 Hours

P20CAP1502	DATA STRUCTURES LAB USING C	L	T	P	J	C
		0	0	4	0	2

Course Outcomes

After successful completion of this course, the students should be able to

CO1 : Develop skills to design and analyze simple linear and nonlinear data structures.
CO2 : Design and analyze the time and space efficiency of the data structures.
CO3 : Apply the suitable data structure for any given real-world problem.
CO4 : Gain knowledge in practical applications of data structures.

Pre–requisite : Nil

COURSE ASSESSMENT METHODS
DIRECT
1. Pre/Post - Experiment Test/Viva; Experimental Report for each Experiment 2. Model Examination 3. End Semester Examination
INDIRECT
1.Course-end survey

LIST OF EXPERIMENTS:

1. Implement linear and binary search in an array.
2. Create a linked list and implement its operations.
3. Implement Stack using array.
4. Implement Stack using linked list.
5. Implement Queue using array.
6. Implement Queue using linked list.
7. Implement Quick sort using recursion.
8. Implement Merge sort using recursion.
9. Implement a binary search tree.
10. Implement the tree traversals on a binary search tree.
11. Implement breadth first and depth first traversals in a graph.
12. Implement Warshall's algorithm for transitive closure.
13. Implement shortest path algorithms.

Total : 60 hours

P20CAP1503	PROGRAMMING WITH JAVA LAB	L	T	P	J	C
		0	0	4	0	2

Course Outcomes

After successful completion of this course, the students should be able to

CO1 : Implement object-oriented features using Java.

CO2 : Create interfaces, packages and apply exception handling.

CO3 : Implement RMI and servlet programs.

CO4 : Create applications using JDBC, JSP and Frameworks.

Pre–requisite : Nil

COURSE ASSESSMENT METHODS
DIRECT
1. Pre/Post - Experiment Test/Viva; Experimental Report for each Experiment 2. Model Examination 3. End Semester Examination
INDIRECT
1.Course-end survey

LIST OF EXPERIMENTS:

1. Program to illustrate declaration and access control.
2. Program to illustrate assignments.
3. Program to illustrate the use of operators.
4. Program to illustrate flow control.
5. Program to implement various OOPS concepts.
6. Program to illustrate APIs like collection, I/O etc.
7. Program to implement the concept of interfaces and packages.
8. Program to implement exceptions handling mechanism.
9. Program using applets.
10. Program to illustrate the use of RMI (Remote Method Invocation).
11. Create an applications using Servlet.
12. Perform database connectivity using JDBC.
13. Use JSP tag to create an application.
14. Illustrate an application using Spring.
15. Develop applications using Hibernate.

Total : 60 hours

SEMESTER – II

P20CAT2001	SOFTWARE ENGINEERING METHODOLOGIES AND QUALITY ASSURANCE	L	T	P	J	C
		3	0	0	0	3

Course Outcomes

After successful completion of this course, the students should be able to

CO 1: Get an insight into the processes of software development.
CO 2: Understand the problem domain and modeling.
CO 3: Apply design techniques software products.
CO 4: Implement software quality management concepts.
CO 5: Apply software testing techniques for information systems development

Pre–requisite **:** Nil

COURSE ASSESSMENT METHODS
DIRECT
1. Continuous Assessment Test I, II 2. Assignment; Group Presentation 3. End Semester Examination

1.Course-end survey

INTRODUCTION	**9 Hours**
Introduction to Software Engineering – A Generic Process Model – Prescriptive Process Models: Waterfall, Incremental, Prototyping, and Spiral Model – The Unified Process – Introduction to Agile and Scrum methodologies.	

MODELING	**9 Hours**
Understanding Requirements – Scenario Based Requirements Modeling, Data Modeling Concepts, Class Based Requirements Modeling.	

SOFTWARE DESIGN	**9 Hours**
Design Concepts – Design Models – Architectural Design: Software Architecture – Architectural Styles – Architectural Design – Component Level Design: Component – Designing Class Based Components	

QUALITY MANAGEMENT	**9 Hours**
Quality Concepts – Achieving Software Quality – Review Techniques – Software Configuration Management (SCM) – SCM Repository – SCM Process – Software Maintenance and Supportability.	

SOFTWARE TESTING	**9 Hours**
Unit Testing – Integration Testing – System Testing: Performance, Load, Stress, Security, Recoverability, Compatibility Testing – Regression Testing – Installation Testing – Usability	

Testing – Acceptance Testing – Alpha Testing and Beta Testing – Static vs. Dynamic Testing – Manual vs. Automatic Testing – Black Box Testing – White Box Testing.
Theory: 45 Hours **Tutorial: -** **Total Hours: 45 Hours**

P20CAI2202	WEB TECHNOLOGIES	L	T	P	J	C
		3	0	2	0	4

Course Outcomes

After successful completion of this course, the students should be able to

CO1: Create a basic website using HTML and Cascading Style Sheets.
CO2: Design and implement dynamic web page with validation using JavaScript objects and by applying different event handling mechanisms.
CO3: Design rich client presentation using AJAX.
CO4: Design and implement simple web page to present data in XML format.
CO5: Design front end web page and connect to the back-end databases.

Pre–requisite : Nil

COURSE ASSESSMENT METHODS
DIRECT
1. Continuous Assessment Test I, II (Theory component)
2. Assignment (Theory component)
3. Demonstration etc (as applicable) (Theory component)
4. Pre/Post - Experiment Test/Viva; Experimental Report for each Experiment (lab Component)
5. Model Examination (lab component)
6. End Semester Examination (Theory and lab components)
INDIRECT
1.Course-end survey

WEB FUNDAMENTALS AND XHTML	**5 Hours**

Web browsers, web servers, MIME, URL, HTTP. Introduction to XHTML5 tags, Basic syntax and structure, text markups, images, lists, tables, Media tags-audio and video, forms, frames.

UI DESIGN	**10 Hours**

Markup Language (HTML5): Basics of Html -Syntax and Tags of Html- Introduction to HTML5 -Semantic/Structural Elements -HTML5 Style Guide and Coding Convention– Html Svg and Canvas – Html API"s - Audio & Video - Drag/Drop - Local Storage - Web Socket API– Debugging and Validating Html.

Cascading Style Sheet (CSS3): The Need for CSS – Basic Syntax and Structure Inline Styles – Embedding Style Sheets - Linking External Style Sheets - Introduction to CSS3 – Backgrounds - Manipulating text - Margins and Padding - Positioning Using CSS -Responsive Web Design - Introduction to LESS/SASS

JAVASCRIPT	**9 Hours**

Introduction to JavaScript, controls statements, Arrays and functions, pattern matching, Element Access, Event Handling.

BOOTSTRAP	**6 Hours**
Introduction to Bootstrap, First example, containers, Bootstrap elements: colors, tables, images, buttons, button groups, progress bars, Forms, utilities, Classes, alerts, custom forms, Grid System.	
JQUERY	**6 Hours**
Introduction to JQuery, Syntax, selectors, events, JQuery HTML, JQuery Effects, JQuery CSS.	
ANGULAR JS	**9 Hours**
Introduction to Angular JS, Directives, Expressions, Directives, Controllers, Filters, Services, Events, Forms, Validations, Examples.	
Theory: 45 Hours	**Tutorial: -** **Total: 45 Hours**

List of Experiments :

1. Create a web page with the following using HTML5
    a) To embed an image map in a web page
    b) To fix the hot spots
    c) Show all the related information when the hot spots are clicked.
2. Create a web page with all types of Cascading style sheets.
3. Implement Client-Side Scripts for Validating Web Form Controls using JavaScript
4. Designing Quiz Application PersonalInformation System/ Using JavaScript
5. Write a JavaScript for Loan Calculation.
6. Write a JavaScript to design a simplecalculator to perform the following operations:sum, product, difference and quotient.
7. Develop and demonstrate a HTML file that includes JavaScript that uses functions for the following problems:
    a) Parameter: A stringOutput: The position in the string of the left-most vowel
    b) Parameter: A numberOutput: The number with its digits in the reverse order
8. Write a JavaScript that calculates the squares and cubes of the numbers from 0 to 10 and outputs HTML text that displays the resulting values in an HTML table format.
9. Write an AJAX program for parsing a JSON file and formatting the output.
10. Create an online Event Registration form and validate using JQuery

Total: 30 Hours

P20CAT2003	DATA INTENSIVE COMPUTING	L	T	P	J	C
		3	0	0	0	3

Course Outcomes

After successful completion of this course, the students should be able to

CO1: Understand the fundamentals of Data Mining and Pre-processing
CO2: Apply the regression and classification techniques
CO3: Evaluate the models using performance metrics
CO4 : Cluster the high dimensional data and apply the association rules for mining the data
CO5: Apply various methods to detect outliers
CO6: Implement the text analysis

Pre–requisite : Nil

COURSE ASSESSMENT METHODS
DIRECT
1. Continuous Assessment Test I, II 2. Assignment; Group Presentation 3. End Semester Examination
INDIRECT
1.Course-end survey

INTRODUCTION	**3 Hours**
Data Mining – Kinds of Data Mined – Functionalities – Technologies – Applications – Issues – Getting to Know the Data – Types of Data Sets and Attribute Values.	

DATA PRE-PROCESSING	**3 Hours**
Introduction - Need for Data Pre-processing – Data Cleaning – Data Integration and Transformation – Data Reduction – Data Discretization and Concept Hierarchy Generation.	

SUPERVISED LEARNINGTECHNIQUES	**9 Hours**
Basic Concepts – Decision Tree – Naïve Bayes Classification – Bayesian Belief Networks – Backpropagation – Support Vector Machines – Linear Regression – Logistic Regression	

MODEL EVALUATION AND SELECTION	**5 Hours**
Metrics for Evaluating Classifier Performance - Holdout Method and Random Sub sampling - Cross-Validation –ROC Curves - Techniques to Improve Classification Accuracy: Bagging – Boosting – Random Forest	

UNSUPERVISED LEARNING TECHNIQUES	**9 hours**

Association Rule Mining - Market Basket Analysis - Apriori algorithm - FP-growth - Cluster Analysis - K-Means - *k*-Medoids - Distance Measures - Expectation-Maximization Algorithm - Subspace Clustering Methods – Bi-clustering - Clustering Graph and Network Data	
EVALUATION OF CLUSTERING	**3 Hours**
Assessing Clustering Tendency - Determining the Number of Clusters - Measuring Clustering Quality	
OUTLIER ANALYSIS	**5 Hours**
Introduction – Types of Outliers - Outlier Detection Methods: Statistical Approaches - Clustering-Based Approaches - Classification-Based Approaches	
TEXT ANALYSIS	**5 Hours**
Overview – Collecting Raw Text – Representing Text – Text Frequency – Categorizing Documents – Determining Sentiments – Gaining Insights	
DATA VISUALIZATION	**3 Hours**
Key Points supported with Data – Evolution of a Graph – Common Representation Methods – Clean up a Graphics	
Theory: 45 Hours **Tutorial: -**	**Total : 45 Hours**

P20CAT2004	DATA COMMUNICATIONS AND NETWORKS	L	T	P	J	C
		3	0	0	0	3

Course Outcomes

After successful completion of this course, the students should be able to

CO1: Identify the various computer network components, protocol design models and the usage of various types of transmission media and working of LAN technology.

CO2: Understand the IP addressing schemes, routing protocols, congestion control and flow control concepts.

CO3 : Identify the components required to build different types of networks

CO4 : Understand the network applications and protocols and network security.

CO5 : Familiarize with recent trends in computer network implementations.

Pre–requisite : Nil

COURSE ASSESSMENT METHODS
DIRECT
1.Continuous Assessment Test I, II 2.Assignment; Group Presentation 3.End Semester Examination
INDIRECT
1.Course-end survey

INTRODUCTION	**9 Hours**

Introduction – Data Communication - Network Models – OSI Model – Layers in the OSI Model – TCP/IP Protocol Suite – Transmission Media –Switching – Circuit and Packet Switched Networks – Datagram Networks –Virtual Circuit Networks – Data Link Layer - Error Detection and Correction – Data Link Control – Medium Access Control – Wired and Wireless LANs – Connecting Devices – Virtual LANs.

INTERNETWORKING	**9 Hours**

Packet Switching – Network Layer Performance – Logical Addressing – IPv4 Addresses – IPv6 Addresses – Internet Protocol – IPv4 – IPv6 – ICMP v4 – Mobile IP – Unicast Routing.

RELIABILITY AND QUALITY OF SERVICE	**9 Hours**

Process–to–Process Delivery – Protocols – User Datagram Protocol(UDP) – Transmission Control Protocol(TCP) – Congestion Control and Quality of Service(QoS).

NETWORK APPLICATIONS AND SECURITY	**9 Hours**

Domain Name System(DNS) – Name Space – DNS – Distribution of Name Space – DNS in the Internet – Resolution – DNS Messages – Types of Records – Remote Logging – Electronic Mail – Simple Mail Transfer Protocol(SMTP) – File Transfer – World Wide Web(WWW) –Secure Shell-Hyper Text Transfer Protocol(HTTP) – Simple Network Management Protocol(SNMP) – Security – Cryptography and Network Security.

RECENT TRENDS	**9 Hours**

Software Defined Networks Overlay model and network model for cloud computing Network Functions Virtualization Concepts, Benefits, requirements, References architecture – Network Virtualization - Network Virtualization Architecture and Benefits

Theory: 45 Hours	**Tutorial: -**	**Total : 45 Hours**

P20CAP2501	DATA INTENSIVE COMPUTING LAB USING PYTHON	L	T	P	J	C
		0	0	4	0	2

Course Outcomes

After successful completion of this course, the students should be able to

CO1: Understand about the problem solving in real-world machine learning applications.
CO2: Implement the supervised learning principles and concepts through python.
CO3: Implement various unsupervised methods
CO4 : Evaluate Machine Learning Algorithms

Pre–requisite : Nil

COURSE ASSESSMENT METHODS
DIRECT
1.Pre/Post - Experiment Test/Viva; Experimental Report for each Experiment 2.Model Examination 3.End Semester Examination
INDIRECT
1.Course-end survey

List of Experiments:

1. Write a Python program to load the dataset into a data frame and print the shape of the data, type of the data, number of rows-columns, feature names and the description
2. Write a Python program to get the number of observations, missing values and Null values for the given data set.
3. Write a python program to implement various pre-processing techniques in the dataset.
4. Write a Python program to split the dataset into Training and Testing data. Fit the data into the model and calculate the performance measures using Decision Tree.
5. Write a program to implement the naïve Bayesian classifier for a sample training data set. Compute the accuracy of the classifier, considering few test data sets.
6. Build an Artificial Neural Network by implementing the Backpropagation algorithm and test the same using appropriate data sets.
7. Implement support vector machine for the given data set.
8. Implement the K-Means algorithm for the given data set. Evaluate the performance using various K values.
9. Implement EM algorithm for the given data set.
10. Implement Apriori algorithm and generate the association rules.
11. Write a python program to implement linear and logistic regression.
12. Evaluate the various model using performance metrics and find the find best model for the given dataset.
13. Implement a Python program to analyze the text in the document.

Total: 60 hours

P20CAI2603	ENGINEERING CLINICS	L	T	P	J	C
		0	0	2	2	2

Course Outcomes

After successful completion of this course, the students should be able to

CO1: Understand and explain the functionality of IoT and cloud concepts

CO2: Design and build simple IoT projects

CO3: Ability to work as a team and apply the IoT and cloud concepts in their own design project/innovate a viable product

Pre–requisite : Nil

List of Experiments:

1. Basics of ARDUINO and IoT
2. Working with LEDs & Digital Switch
3. Adjusting voltage using potentiometer, to find the distance of an object using ultrasonic Sensor
4. Finding the Temperature and Humidity in the surroundings &Detecting the motion of human using PIR
5. Working with Servo motor
6. Establish communication using Bluetooth
7. Examples of Software-as- a-Service (SaaS), Platform-as- a-Service (PaaS), Infrastructure-as- a-Service (IaaS)
8. Creation of virtual Firewall
9. Creation of VM backup
10. Deployment of VMs in Oracle Virtual box
11. Install storage controller and interact with it
12. Hosting Web application in cloud

Total: 30 hours

SEMESTER III

P20CAI3201	SERVICE ORIENTED ARCHITECTURE	L	T	P	J	C
		3	0	2	0	4

Course Outcomes

After successful completion of this course, the students should be able to

CO1: Get the foundations and concepts of service-based computing.
CO2: Understand service - oriented analysis techniques.
CO3: Understanding the basic operational model of web services.
CO4: Gain the knowledge of key technologies in the service-oriented computing arena.
CO5: Apply and practice the learning through a real or illustrative project/case study.

Pre–requisite : Nil

COURSE ASSESSMENT METHODS

INTRODUCTION	**7 Hours**

Overview – Applications – Intranets and the Cloud – First Movers in the Cloud – Benefits – Limitations – Security Concerns.

CLOUD COMPUTING TECHNOLOGY	**8 Hours**

Cloud Computing Services : IaaS – PaaS – SaaS – Software Plus Services – Hardware and Infrastructure : Clients – Security – Network – Services – Accessing the cloud : Platforms – Web Applications – Web APIs – Web Browsers.

CLOUD STORAGE AND STANDARDS	**7 Hours**

Cloud Storage: Overview – Cloud Storage Providers – Standards: Application – Client – Infrastructure – Service.

DEVELOPING APPLICATIONS	**11Hours**

Google : Payment – Force.com and Google – Google Gears – Microsoft : Live services – MS SQL Services – MS .NET Services – MS SharePoint Services – Dynamic CRM Services – Design –

Development : Amazon Web Services - Google App Engine – Salesforce – MS Windows Azure – SAP HANA- Trouble Shooting – Application Management

CLOUD DESIGN	**5 Hours**

Web Application Design – Machine Image Design – Privacy Design – Database Management.

CLOUD SECURITY	**7 Hours**

Data Security – Network Security – Host Security – Compromise response.

Theory: 45 **Tutorial: -** **Total Hours: 45 Hrs**

LIST OF EXPERIMENTS

1.Develop cloud applications using IAAS, PAAS and SAAS.
2.Develop an application using storage services with the help of versioning in cloud.
3.Creating VPC using networking and content delivery services.
4.Develop an application to set up cloud watch to get SNS notifications in Gmail.
5.Develop an application for creating vault in S3 glacier and create user in IAM and storing data in Fastglacier.
6.Develop an application for creating bucket using S3 and create distribution in cloud front to open the website.
7.Create an application for creating role using IAM.
8.Create an application using elastic beanstalk under compute services.
9.Creating a file using elastic file system under storage services.
10.Create a role in IOT device defender under Internet of things.

P20CAE0002	OBJECT ORIENTED ANALYSIS AND DESIGN	L	T	P	J	C
		3	0	0	0	3

Course Outcomes

After successful completion of this course, the students should be able to

CO1: Understand the basic concepts to identify state and behavior of real world objects.

CO2: Apply the various object oriented methodologies and choose the appropriate one for solving the problem with the help of various case studies.

CO 3: Understand the concept of analysis, design and testing to develop a document for the project.

CO 4: Implement analysis, design and testing phases in developing a project using object orientation.

CO 5: Understand and apply testing techniques for object oriented software.

Pre–requisite : Nil

COURSE ASSESSMENT METHODS
DIRECT
1.Continuous Assessment Test I, II 2.Assignment; Group Presentation 3.End Semester Examination
INDIRECT
1.Course-end survey

INTRODUCTION	**6 Hours**

An Overview – Object Basics – Object State and Properties – Behavior – Methods – Messages – Information Hiding – Class Hierarchy – Relationships – Associations – Aggregations – Identity – Dynamic Binding – Persistence – Meta Classes – Object Oriented System Development Life Cycle.

METHODOLOGY AND UML	**12 Hours**

Introduction – Survey – Rumbaugh, Booch and Jacobson Methodologies – Unified Approach – Unified Modeling Language – UML Diagrams – Class Modeling – State Modeling – Interaction Modeling – Introduction to Patterns and Frameworks.

OBJECT ORIENTED ANALYSIS	**9 Hours**

Identifying Use Case – Business Object Analysis – Use Case Driven Object Oriented Analysis – Use Case Model – Documentation – Classification – Identifying Object, Relationships, Attributes, Methods – Super – Sub Class – A–Part–of Relationships, Identifying Attributes and Methods – Object Responsibility.

OBJECT ORIENTED DESIGN	**7 Hours**
Design Process and Benchmarking – Axioms – Corollaries – Designing Classes – Class Visibility – Refining Attributes – Methods and Protocols – Object Storage and Object Interoperability – MVC Architectural Pattern and Design – Designing the System.	
ACCESS LAYER	**3 Hours**
Object Persistence – Object Oriented Database Management Systems – Object Relational Systems – Multi Database Systems – Designing Access Layer Classes	
VIEW LAYER	**3 Hours**
User Interface Design – Designing View Layer Classes – Macro Level Process – Micro Level Process – The purpose of a View Layer Interface.	
SOFTWARE QUALITY ASSURANCE AND TESTING	**5 Hours**
Testing Strategies – Impact of Object Orientation on Testing – Test Cases – Test Plan – Usability Testing – User Satisfaction Testing.	
Theory: 45 **Tutorial: -**	**Total : 45 Hours**

P20CAE0003	GAME DEVELOPMENT	L	T	P	J	C
		3	0	0	0	3

Course Outcomes

After successful completion of this course, the students should be able to

CO1: Understand the concepts of Game design and development.
CO2: Analyze the processes, mechanics and issues in Game Design.
CO3: Be exposed to the Core architectures of Game Programming.
CO4: Know about Game programming platforms, frame works and engines.
CO5: Design and develop games

Pre–requisite : Nil

COURSE ASSESSMENT METHODS
DIRECT
1.Continuous Assessment Test I, II 2.Assignment; Group Presentation 3.End Semester Examination
INDIRECT
1.Course-end survey

3D GRAPHICS FOR GAME PROGRAMMING	**9 hours**

3D Transformations – Quaternions - 3D Modeling and Rendering - Ray Tracing - Shader Models – Lighting – Color – Texturing - Camera and Projections - Culling and Clipping - Character Animation - Physics-based Simulation - Scene Graphs.

GAME ENGINE DESIGN	**9 hours**

Game Engine Architecture - Engine Support Systems - Resources and File Systems - Game Loop and Real-Time Simulation - Human Interface Devices - Collision and Rigid Body Dynamics - Game Profiling.

GAME PROGRAMMING	**9 hours**

Application Layer - Game Logic - Game Views - Managing Memory - Controlling the Main Loop - Loading and Caching Game Data - User Interface Management - Game Event Management.

GAMING PLATFORMS AND FRAMEWORKS	**9 hours**

2D and 3D Game Development using Flash, DirectX, Java, Python - Game development with PyGame- Game engines – DX Studio - Unity.

GAME DEVELOPMENT	**9 hours**
Developing 2D and 3D interactive games using DirectX or Python – Isometric and Tile Based Games - Puzzle games - Single Player games - Multi-Player games.	
Theory: 45 Hours **Tutorial: Nil** **Total : 45 Hours**

P20CAE0004	SOFTWARE PROJECT MANAGEMENT	L	T	P	J	C
		3	0	0	0	3

Course Outcomes

After successful completion of this course, the students should be able to

CO1: Understand the principles and techniques of software project management.

CO2: Describe and apply the evaluation and estimation techniques.

CO3: Perform planning, resource allocation and risks.

CO4: Understand about monitoring and controlling of projects.

CO5: Explain how to manage contracts and people.

Pre–requisite : P20CAT2001- Software Engineering Methodologies and Quality Assurance

COURSE ASSESSMENT METHODS
DIRECT
1. Continuous Assessment Test I, II 2. Assignment; Group Presentation 3. End Semester Examination
INDIRECT
1. Course-end survey

INTRODUCTION	**5 Hours**
Software Project Definition – Need for Software Project Management – Software Projects versus Other Types of Projects – Activities Covered by Software Project Management – Categories of Software Projects – An Overview of Project Planning.	

PROJECT EVALUATION AND APPROACH	**7 Hours**
Strategic and Technical Assessment – Cost Benefit Analysis and Evaluation – Risk Evaluation - Selection of an Appropriate Project Approach.	

SOFTWARE EFFORT ESTIMATION	**8 Hours**
Software Effort Estimation – Basics – Effort Estimation Techniques – Top Down and Bottom Up Estimating Approaches – Function Point Analysis – COCOMO Models.	

ACTIVITY PLANNING	**7 Hours**

Activity Planning – Objectives – Project Schedules – Sequencing and Scheduling Activities – Network Planning Models – Formulation of a Network Model – Forward Pass – Backward Pass – Critical Path – Activity Float – Shortening Project Duration – Activity on Arrow Networks.	
RISK MANAGEMENT	**3 Hours**
Nature and Types of Risk – Managing Risk – Risk planning and control.	
RESOURCE ALLOCATION	**5 Hours**
Resource Allocation – Nature of Resources – Identifying Resources – Scheduling Resources – Creating Critical Paths – Cost Schedules.	
MONITORING AND CONTROL	**5 Hours**
Monitoring and Control – Creating Framework – Collecting the Data – Visualizing Progress – Cost Monitoring.	
MANAGING CONTRACTS AND PEOPLE	**5 Hours**
Managing Contracts – Types of Contracts – Stages in Contract Placement – Organizational Behavior- Selecting the Right Person – Motivation.	
Theory: 45 Hours **Tutorial: Nil** **Total : 45 Hours**

P20CAE0005	E-COMMERCE	L	T	P	J	C
		3	0	0	0	3

Course Outcomes

After successful completion of this course, the students should be able to

CO 1: Understand the differences between E–Commerce and traditional commerce.
CO 2: Analyse the legal, ethical and social issues of E-Commerce.
CO 3: Understand the selling and marketing on web.
CO 4: Analyse the features of Business to business activities.
CO 5: Understand the current technological advancements in E-commerce.

Pre–requisite : Nil

COURSE ASSESSMENT METHODS
DIRECT
1. Continuous Assessment Test I, II 2. Assignment; Group Presentation 3. End Semester Examination
INDIRECT
1. Course-end survey

INTRODUCTION **5 Hours**

Introduction to Electronic Commerce: The Evolution of Electronic Commerce – Business Models – Revenue Models and Business Processes – Economic Forces and Electronic Commerce– Identifying Electronic Commerce Opportunities – International Nature of Electronic Commerce.

ENVIRONMENT OF ELECTRONIC COMMERCE **4 Hours**

Legal, Ethical, and Tax Issues: The Legal Environment of Electronic Commerce – Use and Protection of Intellectual Property in Online Business – Online Crime, Terrorism and Welfare – Ethical Issues – Taxation and Electronic Commerce.

COMMERCE ON WEB **9 Hours**

Selling on the Web: Revenue Models for Online Business - Changing Strategies: Revenue Models in Transition - Revenue Strategy Issues for Online Businesses - Creating an Effective Business Presence Online - Web Site Usability -Using the Web to Connect with Customers. Marketing on the Web: Web Marketing Strategies – Communicating with Different Market Segments – Beyond Market Segmentation: Customer Behavior and Relationship Intensity – Advertising on the Web – E–Mail Marketing – Technology Enabled Customer Relationship Management – Creating and Maintaining Brands on the Web – Search Engine Positioning and Domain Names.

BUSINESS ACTIVITIES **9 Hours**

Business-to-Business Activities: Improving Efficiency and Reducing Costs – Introduction - Purchasing, Logistics, and Business Support Processes - Electronic Data Interchange - Supply Chain Management Using Internet Technologies - Online Business Marketplaces and Networks. Social

Networking, Mobile Commerce, and Online Auctions – Introduction - From Virtual Communities to Social Networks - Mobile Commerce - Online Auctions.	
SECURITY	**5 Hours**
Electronic Commerce Security: Online Security Issues Overview – Security for Client Devices– Communication Channel Security – Security for Server Computers – Organizations that Promote Computer Security.	
WEB SERVER HARDWARE AND SOFTWARE	**4 Hours**
Web Server Basics – Software for Web Servers – Electronic Mail – Web Site Utility Programs – Web Server Hardware	
PAYMENT SYSTEMS	**9 Hours**
Common Online Payment Methods - Payment Cards - Digital Cash - Digital Wallets - Internet Technologies and the Banking Industry - Payment System Threats: Phishing and Identity Theft. Case Studies: E–Commerce Web Sites.	
Theory: 45 **Tutorial: -** **Total: 45 Hours**

P20CAE0006	TCP/IP V6 PROTOCOL SUITE	L	T	P	J	C
		3	0	0	0	3

Course Outcomes

After successful completion of this course, the students should be able to

CO1: Understand the implementation of various standards in the network protocols.
CO2: Interact with the network utilities.
CO3: Know the design aspects involved in the protocols of the TCP/IP protocol suite.
CO4: Design, implement, configure and manage a computer network.
CO5: Understand the functionality of the process in the protocol suite

Pre–requisite : Nil

COURSE ASSESSMENT METHODS
DIRECT
1.Continuous Assessment Test I, II 2.Assignment; Group Presentation 3.End Semester Examination
INDIRECT
1.Course-end survey

INTRODUCTION	10 Hours

Standards – Internet – OSI Model – TCP/IP Protocol suite – Addressing – Wired Local Area Networks – Wireless Local Area Networks – Connecting Devices.

INTERNET PROTOCOL	10 Hours

IP addressing – Introduction – Classful Addressing – Classless Addressing – Special Address – NAT IP Packets – Delivery – Forwarding – Structure of Router – IPv4 Introduction – Datagram – Fragmentation – Checksum – IP Package – Address Resolution Protocol (ARP) – Internet Control Message Protocol (ICMP) – Internet Protocol Version 6 (IPV6) Addressing – IPV6 Protocol.

TRANSPORT PROTOCOL	8 Hours

User Datagram Protocol (UDP) – UDP Applications – UDP Package – UDP Design – Transmission Control Protocol (TCP) Services – TCP Features – Segment – Connection – State Transition Diagram – Windows in TCP – Flow Control – Error Control – Congestion Control.

APPLICATION LAYER AND CLIENT SERVER MODEL	8 Hours

Client Server Paradigm – Dynamic Host Configuration Protocol(DHCP) – DHCP Operation – DHCP Configuration – Domain Name System (DNS) – Name Space – DNS in the Internet – Resolution – DNS Message – Types of Records – TELNET.

APPLICATION PROTOCOLS	**9 Hours**
File Transfer Protocol (FTP) – Connections – Communication – World Wide Web and Hypertext Transfer Protocol (HTTP) – Electronic Mail – Simple Network Management Protocol (SNMP) – Management Components – Structure Management Information (SMI) – Management Information Base (MIB).	
Theory: 45	**Tutorial: -** **Total Hours: 45 Hours**

P20CAE0007	WIRELESS NETWORKS	L	T	P	J	C
		3	0	0	0	3

Course Outcomes

After successful completion of this course, the students should be able to

CO 1: Explain about wireless networks, protocol stack and standards.
CO 2: Conversant with the latest 3G/4G and WiMAX networks and its architecture.
CO 3: Design and implement wireless network environment for any application using latest wireless protocols and standards.
CO 4: Describe the platform architectures that are suitable for mobile computing and communications.
CO 5: Implement different type of applications for smart phones and mobile devices with latest network strategies.
CO 6: Understand various security threats and describe proposed solutions.

Pre–requisite : Nil

COURSE ASSESSMENT METHODS
DIRECT
1. Continuous Assessment Test I, II 2. Assignment; Group Presentation 3. End Semester Examination
INDIRECT
1. Course-end survey

WIRELESS LAN **9 Hours**

Introduction-WLAN technologies: Infrared, UHF narrowband, spread spectrum -IEEE802.11: System architecture, protocol architecture, physical layer, MAC layer, 802.11b, 802.11a – Hiper LAN: WATM,BRAN, HiperLAN2 – Bluetooth: Architecture, Radio Layer, Baseband layer, Link manager Protocol, security - IEEE802.16-WIMAX: Physical layer, MAC, Spectrum allocation for WIMAX

MOBILE NETWORK LAYER **9 Hours**

Introduction - Mobile IP: IP packet delivery, Agent discovery, tunneling and encapsulation, IPV6-Network layer in the internet- Mobile IP session initiation protocol - mobile ad-hoc network: Routing, Destination Sequence distance vector, Dynamic source routing.

MOBILE TRANSPORT LAYER **9 Hours**

TCP enhancements for wireless protocols - Traditional TCP: Congestion control, fast retransmit/fast recovery, Implications of mobility - Classical TCP improvements: Indirect TCP, Snooping TCP, Mobile TCP, Time out freezing, Selective retransmission, Transaction oriented TCP - TCP over 3G wireless networks.

WIRELESS WIDE AREA NETWORK	**9 Hours**
Overview of UTMS Terrestrial Radio access network-UMTS Core network Architecture: 3G-MSC, 3GSGSN, 3G-GGSN, SMS-GMSC/SMS-IWMSC, Firewall, DNS/DHCP-High speed Downlink packet access (HSDPA)- LTE network architecture and protocol.	
4G NETWORKS	**9 Hours**
Introduction – 4G vision – 4G features and challenges - Applications of 4G – 4G Technologies: Multicarrier Modulation, Smart antenna techniques, OFDM-MIMO systems, Adaptive Modulation and coding with time slot scheduler, Cognitive Radio.	
Theory: 45 Hours **Tutorial: -**	**Total : 45 Hours**

P20CAE0008	BLOCKCHAIN TECHNOLOGIES	L	T	P	J	C
		3	0	0	0	3

Course Outcomes

After successful completion of this course, the students should be able to

CO1: Understand the technology components of Blockchain and how it works behind the scenes.
CO2: Be aware of different approaches to developing decentralized applications.
CO3: Understand the Bitcoin and its limitations by comparing with other alternative coins.
CO4: Establish deep understanding of the Ethereum model, its consensus model and code execution.
CO5: Understand the architectural components of a Hyperledger and its development framework.
CO6: Aware of the alternative blockchains and emerging trends in blockchain

Pre–requisite : Nil

COURSE ASSESSMENT METHODS
DIRECT
1.Continuous Assessment Test I, II 2. Assignment 3. Demonstration etc 4. End Semester Examination
INDIRECT
1. Course-end survey

INTRODUCTION TO BLOCKCHAIN	9 Hours

History of Blockchain – Types of Blockchain – Consensus – Decentralization using Blockchain – Blockchain and Full Ecosystem Decentralization – Platforms for Decentralization.

INTRODUCTION TO CRYPTOCURRENCY	9 Hours

Bitcoin – Digital Keys and Addresses – Transactions – Mining – Bitcoin Networks and Payments – Wallets – Alternative Coins – Theoretical Limitations – Bitcoin limitations – Name coin – Prime coin – Zcash – Smart Contracts – Ricardian Contracts.

ETHEREUM	9 Hours

The Ethereum Network – Components of Ethereum Ecosystem – Ethereum Programming Languages: Runtime Byte Code, Blocks and Blockchain, Fee Schedule – Supporting Protocols – Solidity Language

WEB3 and HYPER LEDGER	9 Hours

Introduction to Web3 – Contract Deployment – POST Requests – Development Frameworks – Hyperledger as a Protocol – The Reference Architecture – Hyperledger Fabric – Distributed Ledger – Corda.

ALTERNATIVE BLOCKCHAINS AND NEXT EMERGING TRENDS	9 Hours
Kadena – Ripple – Rootstock – Quorum – Tendermint – Scalability – Privacy – Other Challenges – Blockchain Research – Notable Projects – Miscellaneous Tools	
Theory: 45 **Tutorial: -** **Total Hours: 45 Hrs**

P20CAE0009	ACCOUNTING AND FINANCIAL MANAGEMENT	L	T	P	J	C
		3	0	0	0	3

Course Outcomes

After successful completion of this course, the students should be able to

CO1: Understand the balance sheet preparation and do analysis.

CO2: Understand the cost sheet, budget preparation and control of a company.

CO3: Decide about the state of affairs of a particular firm / company.

CO4: Ensure the preparation of fiscal policies of the organization.

CO5: Ensures the factors to be considered in investment policies.

CO6: Estimate the various business activities such as purchase, sale, production and cash budgets.

Pre–requisite : Nil

COURSE ASSESSMENT METHODS

DIRECT

1. Continuous Assessment Test I, II
2. Assignment; Group Presentation
3. End Semester Examination

INDIRECT

1. Course-end survey

FINANCIAL ACCOUNTING — **9 Hours**

Meaning and Scope of Accounting – Principles – Concepts and Conventions – Double Entry Book Keeping – Books of Accounts: Preparation of Journals – Ledger – Trial Balance – Trading, Profit and Loss Account – Balance Sheet.

COST ACCOUNTING — **9 Hours**

Meaning – Objectives – Elements of Cost – Preparation of Cost Sheet – Methods of Costing – Marginal Costing – Cost Volume Profit Analysis – Break Even Analysis – Fund Flow Analysis – Cash Flow Analysis.

BUDGETS AND BUDGETARY CONTROL — **9 Hours**

Budgets and Budgetary Control – Meaning – Types – Sales Budget – Production Budget – Cost of Production Budget – Flexible Budgeting – Cash Budget – Master Budget – Zero Base Budgeting.

FINANCIAL MANAGEMENT AND COST OF CAPITAL — **9 Hours**

Objectives and Functions of Financial Management – Cost of Capital – Factors Affecting Cost of Capital – Capital Budgeting: Net Present Value – Internal Rate of Return – Profitability Index – Pay – Back and Discounted Pay – Back Method

CAPITAL STRUCTURE AND WORKING CAPITAL MANAGEMENT — **9 Hours**

Capital Structure – Factors Affecting Capital Structure – Dividend Policy – Types of Dividend Policy – Concepts of Working Capital – Working Capital Policies – Factors Affecting Working Capital – Estimation of Working Capital Requirements.

Theory: 45	**Tutorial: NIL**	**Total : 45 Hours.**

P20CAE0010	ENTERPRISE RESOURCE PLANNING	L	T	P	J	C
		3	0	0	0	3

Course Outcomes

After successful completion of this course, the students should be able to

CO1: Have a sound knowledge on the basic concept of ERP.
CO2: Build a business model in an ERP package.
CO3: Understand the advantages of the ERP solution.
CO4: Be aware of the various commercial ERP packages.
CO5: Know the architecture concepts and services of an ERP package

Pre–requisite : Nil

COURSE ASSESSMENT METHODS

DIRECT

1.Continuous Assessment Test I, II
2.Assignment; Group Presentation
3.End Semester Examination

INDIRECT

1.Course-end survey

INTRODUCTION TO ERP — **4 Hours**

Integrated Management Information Seamless Integration – Supply Chain Management – Integrated Data Model – Benefits of ERP

BUSINESS ENGINEERING — **5 Hours**

Business Engineering and ERP – Definition of Business Engineering – Principle of Business Engineering – Business Engineering with Information Technology- Introduction to Business Process Reengineering.

BUSINESS MODELLING FOR ERP — **9 Hours**

Building the Business Model – ERP Implementation – An Overview – Role of Consultant, Vendors and Users – Customization – Precautions – ERP Post Implementation Options – ERP Implementation Technology – Guidelines for ERP Implementation.

ERP AND THE COMPETITIVE ADVANTAGE — **9 Hours**

ERP domain Manufacturing (MFG)/Pro – Industrial and Financial Systems (IFS)/Avalon – Industrial and Financial Systems – Baan IV, Systems Applications and Products (SAP) – Market Dynamics and Dynamic Strategy.

COMMERCIAL ERP PACKAGE — **9 Hours**

Description – Multi–Client/Server Solution – Open Technology – User Interface – Application Integration.	
ARCHITECTURE	**9 Hours**
Basic Architectural Concepts – The System Control Interfaces – Services – Presentation Interface – Database Interface.	
Theory: 45 Hours. **Tutorial:** **Total 45 Hours.**

P20CAE0011	BUSINESS DOMAINS IN COMPUTER APPLICATIONS	L	T	P	J	C
		3	0	0	0	3

Course Outcomes

After successful completion of this course, the students should be able to

CO1**:** Describe about marketing, consumer behaviour and marketing segmentation.
CO2**:** Explain about human resource management and terms associated with it.
CO3**:** Understand the need for supply chain management and inventory control techniques.
CO4**:** Explain about customer relationship management in various domains.
CO5**:** Know the basics of banking and insurance process.

Pre–requisite **:** Nil

COURSE ASSESSMENT METHODS
DIRECT
1. Continuous Assessment Test I, II 2. Assignment 3. Demonstration etc (as applicable) 4. End Semester Examination
INDIRECT
1.Course-end survey

MARKETING	**8 Hours**

Definition - Importance of Consumer Behavior- Steps in Buyer Decision Process - Market Segmentation- Marketing Mix: 7 Ps of Marketing.

HUMAN RESOURCE MANAGEMENT	**7 Hours**

Employee Database- Recruitment -Selection Processes- Employee Appraisal- Leave Types- Payroll – Salary Calculation - Income Tax Calculation – Reporting – PF – Gratuity - Bonus.

SUPPLY CHAIN MANAGEMENT (SCM)	**10 Hours**

Introduction to Supply Chain -Major Drivers of Supply Chain- Value in Supply Chain- Quality, Delivery, Flexibility- Source Management in Supply Chain- In Sourcing-Outsourcing- Make Vs Buy- Managing Inventory in Supply Chain- Definition of Inventories- Role of Inventory- Inventory Control Techniques (ABC Analysis, VED Analysis)- Vendor Managed Inventory- Transportation– Modes of Transportation-Transportation Management System (TMS).

CUSTOMER RELATIONSHIP MANAGEMENT (CRM)	**10 Hours**

Introduction to CRM -Need for CRM- Customer Life Cycle- Use of CRM in Business - CRM Implementation Strategy- CRM Applications in Hospital Management-Travel Industry- Hotel Industry.

BANKING AND INSURANCE	**10 Hours**
Accounts and Deposits- Types of Accounts-Saving Account-Current Account- Demat Account-Digital Payments – NEFT- RTGS- IMPS- BHIM- UPI-Wallets. Loans - Various Types of Loans- Personal - Home Loan-Vehicle Loan - Loan Against Security - Business Loans- Loan Sanction Process- Insurance- Types of Insurance- Life- Health- Accident-Home- Motor- Loan Insurance- Insurance Processes.	
Theory: 45 Hours **Tutorial: -** **Total : 45 Hours**

P20CAE0012	BIG DATA ANALYTICS	L	T	P	J	C
		3	0	0	0	3

Course Outcomes

After successful completion of this course, the students should be able to

CO1: Work with big data platform and Understand the fundamentals of various big data analysis techniques.
CO2: Analyze the big data analytic techniques for useful business applications.
CO3: Design efficient algorithms for mining the data from large volumes
CO4: Analyze the HADOOP and Map Reduce technologies associated with big data analytics.
CO5 : Explore the applications of Big Data.

Pre–requisite : P20CAT1002 - Database Technologies

COURSE ASSESSMENT METHODS
DIRECT
1. Continuous Assessment Test I, II 2. Assignment 3. Demonstration etc (as applicable) 4. End Semester Examination
INDIRECT
1.Course-end survey

INTRODUCTION TO BIG DATA — 9 Hours

Introduction to Big Data Platform –Challenges of Conventional Systems -Intelligent data analysis –Nature of Data-Analytic Processes and Tools -Analysis vs Reporting -Modern Data Analytic Tools -Statistical Concepts: Sampling Distributions -Re-Sampling -Statistical Inference -Prediction Error

MINING DATA STREAMS — 9 Hours

Introduction To Streams Concepts –Stream Data Model and Architecture -Stream Computing -Sampling Data in a Stream –Filtering Streams –Counting Distinct Elements in a Stream –Estimating Moments–Counting Oneness in a Window –Decaying Window -Real time Analytics Platform(RTAP)Applications –-Case Studies -Real Time Sentiment Analysis, Stock Market Predictions.

HADOOPENVIRONMENT — 9 Hours

History of Hadoop-The Hadoop Distributed File System –Components of Hadoop-Analyzing the Data with Hadoop -Scaling Out-Hadoop Streaming-Design of HDFS-Hadoop file systems-Java interfaces to HDFS-Basics-Developing a Map Reduce Application-How Map Reduce Works-Anatomy of a Map Reduce Job run-Failures-Job Scheduling-Shuffle and Sort –Task execution -Map Reduce Types and Formats-Map Reduce Features -Setting up a Hadoop Cluster -Cluster specification -Cluster Setup and Installation –Hadoop Configuration-Security in Hadoop.

DATA ANALYSIS SYTEMS AND VISUALIZATION — 9 Hours

Link Analysis –Page Rank -Efficient Computation of Page Rank-Topic-Sensitive Page Rank –Link Spam-Recommendation Systems-A Model for Recommendation Systems-Content-Based Recommendations -Collaborative Filtering -Dimensionality Reduction-Visualizations -Visual data analysis techniques-interaction techniques-Systems and applications.

FRAMEWORKS AND APPLICATIONS	**9 Hours**

IBM for Big Data –Framework -Hive –Sharding –NoSQL Databases –Mango DB-Casandra-Hbase – Impala –Analyzing big data with twitter –Big data for Ecommerce –Big data for blogs.

Theory: 45 Hours	**Tutorial: -**	**Total: 45 Hours**

P20CAE0013	MIXED REALITY	L	T	P	J	C
		3	0	0	0	3

Course Outcomes

After successful completion of this course, the students should be able to

CO1: Discuss the basic concepts of Mixed Reality.
CO2: Design and develop the Mixed Reality applications in different domains.
CO3: Design various models using modelling techniques.
CO4: Perform Mixed Reality Programming with toolkits.
CO5: Understand the working principles of input output devices used in mixed reality applications.
CO6: Evaluate mixed reality based applications.

Pre–requisite : Nil

COURSE ASSESSMENT METHODS
DIRECT
1.Continuous Assessment Test I, II 2. Assignment 3. Demonstration etc 4. End Semester Examination
INDIRECT
1. Course-end survey

INTRODUCTION — **9 Hours**

Introduction to Virtual Reality (VR)– Definition – Three I's of VR – VR Vs 3D Computer Graphics – Benefits - Components of VR– Introduction to AR – System Structure– Key Technology in AR – 3D Vision – Approaches - Alternative Interface Paradigms – Spatial AR – Input Devices – 3D Position Trackers – Performance Parameters – Types of Trackers – Navigation and Manipulation Interfaces – Gesture Interfaces – Types of Gesture Input Devices – Output Devices – Graphics Display –Human Visual System – Personal Graphics Displays – Large Volume Displays – Sound Displays –Human Auditory System.

MR COMPUTING ARCHITECTURE — **9 Hours**

Computing Architectures of VR – Rendering Principle – Graphics and Haptics Rendering –PC Graphics Architecture – Graphics Accelerators – Graphics Benchmarks – Workstation Based Architectures – SGI Infinite Reality Architecture – Distributed VR Architectures – Multi-pipeline Synchronization – Collocated Rendering Pipelines – Distributed Virtual Environments – AR Architecture.

MR MODELING — **9 Hours**

Modeling – Geometric Modeling – Virtual Object Shape – Object Visual Appearance – Kinematics Modeling – Transformation Matrices – Object Position – Transformation Invariants – Object Hierarchies – Viewing The 3D World – Physical Modeling – Collision Detection – Surface

Deformation – Force Computation – Force Smoothing And Mapping – Behavior Modeling – Model Management.

MR PROGRAMMING	**9 Hours**

VR Programming – Toolkits and Scene Graphs – World Toolkit – Java 3D – Comparison of World Toolkit and Java 3D - GHOST – People Shop – Human Factors in VR – Methodology and Terminology – VR Health and Safety Issues – VR and Society –Mixed Reality Coding –Trajectories through Mixed Reality Performance – Mobile Interface Design – Quantitative Evaluation – Qualitative Evaluation.

APPLICATIONS	**9 Hours**

Medical Applications of MR – Education, Arts and Entertainment – Military MR Applications – Emerging Applications of MR – MR Applications in Manufacturing – Applications of MR in Robotics – Information Visualization –Wearable Computing – Games

Theory: 45	**Tutorial: -**	**Total Hours: 45 Hrs**

P20CAE0014	DEEP LEARNING TECHNIQUES AND APPLICATIONS	L	T	P	J	C
		3	0	0	0	3

Course Outcomes

After successful completion of this course, the students should be able to

CO1: Understand the role of deep learning in machine learning applications.
CO2: Get familiar with the use of TensorFlow and Keras in deep learning applications.
CO3: Design and implement deep learning applications.
CO4: Critically analyze different deep learning models in image related projects.
CO5: Design and implement convolutional neural networks.

Pre–requisite : P20CAT2003 – Data Intensive Computing

COURSE ASSESSMENT METHODS

DIRECT

1.Continuous Assessment Test I, II
2. Assignment
3. Demonstration etc
4. End Semester Examination

INDIRECT

1. Course-end survey

BASICS OF NEURAL NETWORKS — **9 Hours**

Basic Concept of Neurons – Perceptron Algorithm – Feed Forward and Backpropagation Networks

INTRODUCTION TO DEEP LEARNING — **9 Hours**

Deep Feed-Forward Neural Networks – Gradient Descent – Back-Propagation and Other Differentiation Algorithms – Vanishing Gradient Problem – Mitigation – Rectified Linear Unit (ReLU) – Heuristics for Avoiding Bad Local Minima – Heuristics for Faster Training –Nestor's Accelerated Gradient Descent – Regularization for Deep Learning – Dropout – Adversarial Training – Optimization for Training Deep Models

CONVOLUTIONAL NEURAL NETWORKS — **9 Hours**

CNN Architectures – Convolution – Pooling Layers – Transfer Learning – Image Classification using Transfer Learning – Recurrent and Recursive Nets – Recurrent Neural Networks – Deep Recurrent Networks – Recursive Neural Networks-Applications

ADDITIONAL DEEP LEARNING ARCHITECTURES — **9 Hours**

Long Short Term Memory (LSTM) Networks – Sequence Prediction – Gated Recurrent – Encoder/Decoder Architectures – Autoencoders – Standard – Sparse – Denoising – Contractive – Variational Autoencoders – Applications of Autoencoders – Representation Learning – Deep generative Models – Belief Networks – Generative Networks – Generative Schemes – Evaluating Generative Models.

APPLICATIONS OF DEEP LEARNING	**9 Hours**
Images segmentation – Object Detection – Automatic Image Captioning – Image generation with Generative adversarial networks – Attention models for Computer Vision – Case Study: Named Entity Recognition – Opinion Mining using Recurrent Neural Networks – Parsing and Sentiment Analysis using Recursive Neural Networks	
Theory: 45 **Tutorial: -** **Total Hours: 45 Hrs**

P20CAE0015	E-LEARNING TECHNIQUES	L	T	P	J	C
		3	0	0	0	3

Course Outcomes

After successful completion of this course, the students should be able to

CO1: Distinguish the phases of activities in the models of E-learning.
CO2: Identify appropriate instructional methods and delivery strategies.
CO3: Choose appropriate E-learning authoring tools.
CO4: Create interactive E-Learning courseware.
CO5: Evaluate the E-learning courseware.
CO6: Manage the E-learning courseware

Pre–requisite : Nil

COURSE ASSESSMENT METHODS
DIRECT
1.Continuous Assessment Test I, II 2. Assignment 3. Demonstration etc 4. End Semester Examination
INDIRECT
1.Course-end survey

INTRODUCTION	**9 Hours**

Need for E-Learning – Approaches of E-Learning – Components of E-Learning – Synchronous and Asynchronous Modes of Learning – Quality of E-Learning – Blended Learning: Activities, Team and Technology – Work Flow to Produce and Deliver E-Learning Content – Basics of Design Thinking.

DESIGNING E-LEARNING COURSE CONTENT	**9 Hours**

Design Models of E-Learning – Identifying and Organizing E-Learning Course Content: Needs Analysis – Analyzing the Target Audience – Identifying Course Content – Defining Learning Objectives – Defining the Course Sequence – Defining Instructional Methods – Defining Evaluation and Delivery Strategies -Case Study

CREATING INTERACTIVE CONTENT	**9 Hours**

Preparing Content: Tips for Content Development and Language Style – Creating Storyboards: Structure of an Interactive E-Lesson – Techniques for Presenting Content – Adding Examples – Integrating Multimedia Elements – Adding Examples – Developing Practice and Assessment Tests – Adding Additional Resources– Courseware Development – Authoring Tools – Types of Authoring Tools – Selecting an Authoring Tool.

LEARNING PLATFORMS	**9 Hours**

Types of Learning Platforms – Proprietary Vs. Open – Source LMS – LMS Vs LCMS – Internally Handled and Hosted LMS – LMS Solutions – Functional Areas of LMS.

COURSE DELIVERY AND EVALUATION	**9 Hours**

Components of an Instructor-Led or Facilitated Course – Planning and Documenting Activities – Facilitating Learners Activities – E-Learning Methods and Delivery Formats – Using Communication Tools for E-Learning – Course Evaluation.

Theory: 45	**Tutorial: -**	**Total Hours: 45 Hrs**

P20CAE0016	ETHICAL HACKING	L	T	P	J	C
		3	0	0	0	3

Course Outcomes

After successful completion of this course, the students should be able to

CO 1: Apply various open source security tools to assess the network and computing system.

CO2: Practice penetration testing to predict the vulnerabilities across any computing system.

CO3 : Explain how to prevent the information and computing assets from any kind of attacks.

CO 4: Understand how to protect the devices in a network from malicious software and worms.

CO 5: Assess the wireless network flaws and be able to provide security solution.

Pre–requisite : P20CAT2004 - Data Communications and Networks

COURSE ASSESSMENT METHODS

DIRECT

1.Continuous Assessment Test I, II
2. Assignment
3. Demonstration etc
4. End Semester Examination

INDIRECT

1.Course-end survey

INTRODUCTION — 9 Hours

Introduction to Hacking – Important Terminologies – Penetration Test – Vulnerability Assessments versus Penetration Test – Pre-Engagement – Rules of Engagement – Penetration Testing Methodologies – OSSTMM – NIST – OWASP – Categories of Penetration Test – Types of Penetration Tests – Vulnerability Assessment Summary – Reports.

INFORMATION GATHERING AND SCANNING — 9 Hours

Information Gathering Techniques – Active Information Gathering – Passive Information Gathering – Sources of Information Gathering – Tracing the Location – Traceroute – ICMP Traceroute – TCP Traceroute – Usage – UDP Traceroute – Enumerating and Fingerprinting the Webservers – Google Hacking – DNS Enumeration – Enumerating SNMP – SMTP Enumeration – Target Enumeration and Port Scanning Techniques – Advanced Firewall/IDS Evading Techniques.

NETWORK ATTACKS — 9 Hours

Vulnerability Data Resources – Exploit Databases – Network Sniffing – Types of Sniffing – Promiscuous versus Non-promiscuous Mode – MITM Attacks – ARP Attacks – Denial of Service Attacks –Hijacking Session with MITM Attack – SSL Strip: Stripping HTTPS Traffic –DNS Spoofing – ARP Spoofing Attack Manipulating the DNS Records – DHCP Spoofing – Remote Exploitation –

Attacking Network Remote Services – Overview of Brute Force Attacks – Traditional Brute Force – Attacking SMTP – Attacking SQL Servers – Testing for Weak Authentication.

EXPLOITATION	**9 Hours**

Introduction to Metasploit – Reconnaissance with Metasploit – Port Scanning with Metasploit – Compromising a Windows Host with Metasploit – Client Side Exploitation Methods – E–Mails with Malicious Attachments – Creating a Custom Executable – Creating a Backdoor with SET – PDF Hacking – Social Engineering Toolkit – Browser Exploitation – Post–Exploitation – Acquiring Situation Awareness – Hashing Algorithms – Windows Hashing Methods – Cracking the Hashes – Brute force Dictionary Attacks – Password Salts – Rainbow Tables – John the Ripper – Gathering OS Information – Harvesting Stored Credentials

WIRELESS AND WEB HACKING	**9 Hours**

Wireless Hacking – Introducing Aircrack– Cracking the WEP – Cracking a WPA/WPA2 Wireless Network Using Aircrack-ng – Evil Twin Attack – Causing Denial of Service on the Original AP – Web Hacking – Attacking the Authentication – Brute Force and Dictionary Attacks – Types of Authentication – Log-In Protection Mechanisms – Captcha Validation Flaw – Captcha RESET Flaw – Manipulating User-Agents to Bypass Captcha and Other Protection – Authentication Bypass Attacks – Testing for the Vulnerability – Automating It with Burp Suite – Session Attacks – SQL Injection Attacks

P20CAE0017	MIDDLEWARE TECHNOLOGIES	L	T	P	J	C
		3	0	0	0	3

Course Outcomes

After successful completion of this course, the students should be able to

CO1: Implement the distributed services using RMI .
CO2: Implement programs in EJB.
CO3: Map and differentiate the functions between COM and .NET.
CO4: Understand the functionalities of various types of middleware technologies.
CO5: Design web services using SOAP, UDDI, WSDL.
CO6: Design middleware applications for real time usage.

Pre–requisite : P20CAT1004 - Programming with JAVA

COURSE ASSESSMENT METHODS
DIRECT
1.Continuous Assessment Test I, II 2. Assignment 3. Demonstration etc 4. End Semester Examination
INDIRECT
1. Course-end survey

INTRODUCTION	**9 Hours**

General Middleware, Service Specific Middleware, Client/Server Building blocks – RPC - Messaging – Peer – to – Peer, Java RMI - Computing standards – OMG - Overview of EJB - Middleware types - Middleware in distributed Applications.

EJB	**9 Hours**

EJB architecture - Overview of EJB software architecture, EJB Conversation, Building and Deploying EJBs, Roles, applications - EJB Session Beans, EJB entity beans - Lifecycle of Beans - EJB clients - developing an application - Deployment.

COM and .NET	**9 Hours**

Evolution of DCOM - Introduction to COM - COM clients and servers - COM IDL - COM Interfaces COM Threading Models – Marshalling - Custom and standard marshalling - Introduction to .NET - Overview of .NET architecture - Remoting

SOA and WEB SERVICES	**9 Hours**

Defining SOA - Business value of SOA - SOA characteristics - Concept of a service, Basic SOA - Enterprise Service Bus (ESB) - SOA enterprise Software Models -Services and SOA – WSDL - SOAP,

UDDI, WS Standards -Web Services and Service Oriented Enterprise (SOE) - Coordination and Transaction - Business Process Execution Language for Web Services.

OTHER TYPES OF MIDDLEWARE	**9 Hours**

Other types of Middleware, Real-Time Middleware, Embedded Systems Middleware, Mobile Middleware, Oracle Fusion Middleware

Theory: 45	**Tutorial: -**	**Total Hours: 45 Hrs**

P20CAE0018	ROBOTIC PROCESS AUTOMATION	L	T	P	J	C
		3	0	0	0	3

Course Outcomes

After successful completion of this course, the students should be able to

CO1: Understand the need and use of automation
CO2: Describe RPA, where it can be applied and how its implemented
CO3: Describe the different types of variables, Control Flow, and data manipulation techniques
CO4: Identify and understand Image, Text, and Data Tables Automation
CO5: Describe automation to Email and various types of Exceptions and strategies to handle
CO6: Build Bots which can do

Pre–requisite : Nil

COURSE ASSESSMENT METHODS
DIRECT
1.Continuous Assessment Test I, II 2. Assignment 3. Demonstration etc 4. End Semester Examination
INDIRECT
1. Course-end survey

RPA CONCEPTS — **9 Hours**

RPA Basics - History of Automation - RPA vs Automation - Processes & Flowcharts - Programming Constructs in RPA - Processes Automation - Types of Bots - Workloads which can be automated - Advanced Concepts - Standardization of processes - Tentative Development methodologies - Difference from SDLC - Robotic control flow architecture - RPA business case -Team - Process Design and Solution Design Document - Industries suited for RPA - Risks & Challenges - RPA and Emerging Ecosystem

RPA TOOL — **9 Hours**

Introduction to RPA Tool - User Interface - Variables - Managing Arguments - Naming Best Practices - Arguments Panel - Using Arguments -Imported Namespaces - Control Flow : Introduction - If Else Statements - Loops - Advanced Control Flow - Sequences - Flowcharts - Control Flow Activities - Data Manipulation -Introduction - Scalar variables, Collections and Tables - Text Manipulation - Gathering and Assembling Data

AUTOMATION CONCEPTS — **9 Hours**

Recording and Advanced UI Interaction - Introduction – Basics - Desktop Recording - Web Recording - Input/Output Methods - Screen Scraping - Data Scraping - Scraping advanced techniques - Selectors - Selectors - Defining and Assessing Selectors - Customization - Debugging - Dynamic Selectors - Partial Selectors

ADVANCED AUTOMATION CONCEPTS AND TECHNIQUES	**9 Hours**
RPA Challenge - Image, Text & Advanced Citrix Automation - Introduction to Image & Text Automation - Information Retrieval - Challenges - Best Practices - Using tab for Images - Starting Apps - Excel Data Tables & PDF - Data Tables in RPA - Excel and Data Table basics - Data Manipulation in excel - Extracting Data from PDF - Anchors - Anchors in PDF.	
EMAIL AUTOMATION & EXCEPTIONAL HANDLING	**9 Hours**
Email Automation - Email Automation - Incoming Email automation - Sending Email automation - Debugging and Exception Handling - Debugging Tools - Strategies for solving issues - Catching errors.	
Theory: 45 **Tutorial: -** **Total Hours: 45 Hrs**

P20CAE0019	LINUX ADMINISTRATION	L	T	P	J	C
		3	0	0	0	3

Course Outcomes

After successful completion of this course, the students should be able to

CO1: Understand an overall view of the structure of Linux.
CO2: Access the different devices through commands.
CO3: Work with kernel and user spaces in Linux environment.
CO4: Automate tasks using scheduling tools.
CO5: Configure network files based on the specific need.
CO6: Acquire Linux Administration skills to manage a server.

Pre–requisite : P20CAT1103- Advanced Operating Systems

COURSE ASSESSMENT METHODS

DIRECT

1.Continuous Assessment Test I, II
2. Assignment
3. Demonstration etc
4. End Semester Examination

INDIRECT

1. Course-end survey

INTRODUCTION — **9 Hours**

Levels and Layers of Abstraction in a Linux System – Hardware – Kernel: Process Management, Memory Management, Device Drivers and Management, System Calls and Support – User Space – Shell Commands

DEVICES, DISKS and FILE SYSTEMS — **9 Hours**

Device Files – Device Path – Device Name Summary – udev – SCSI and Linux Kernel – Partitioning Disk Devices – Filesystems – Swap Space

KERNEL SPACE AND USER SPACE — **9 Hours**

How the Linux Kernel Boots: Startup messages – Kernel initialization and Boot options – Kernel Tentative Parameters – Bootloaders – GRUB – UEFI – Chainloading other operating systems – How the User space starts: Introduction to Init – System V Runlevels – systemd – Upstart – System V init – Shutting down the System – Initial RAM Filesystem – Emergency booting and Single-User modeling

SYSTEM CONFIGURATION, PROCESS AND RESOURCE UTILIZATION — **9 Hours**

Structure of etc – System Logging – User Management Files – Time – Scheduling Tasks with cron and at – Identification and Authentication – Process and Resource Utilization: Tracking Processes – lsof – Tracing Program Execution and System Calls – Threads – Measuring CPU Time – Adjusting Process Priorities – Load Averages – Memory – I/0 Monitoring

NETWORK CONFIGURATION AND SERVICES	**9 Hours**

Network basics – Layers – Routes and Kernel Routing table – Basic ICMP and DNS tools – Physical Layer and Ethernet – Kernel Network Interfaces – NIC configuration – Resolving Hostname – Localhost – Transport layer: TCP, UDP and Services – Revisiting a Simple Local Network – Understanding DHCP – Configuring Linux as a Router – Firewalls – Ethernet, IP and ARP - Wireless Ethernet – Secure Shell ssh – Diagnostic Tool.

Theory: 45	**Tutorial: -**	**Total Hours: 45 Hrs**

P20CAE0020	USER INTERFACE DESIGN AND USER EXPERIENCE	L	T	P	J	C
		3	0	0	0	3

Course Outcomes

After successful completion of this course, the students should be able to

CO1: Build UI for user Applications.
CO2: Know the UI Interaction behaviours and principles.
CO3: Evaluate UX design of any product or application.
CO4: Demonstrate UX Skills in product development.
CO5: Implement Sketching principles
CO6: Create Wireframe and Prototype

Pre–requisite : P20CAI2202- Web Technologies

COURSE ASSESSMENT METHODS
DIRECT
1.Continuous Assessment Test I, II 2. Assignment 3. Demonstration etc 4. End Semester Examination
INDIRECT
1. Course-end survey

FOUNDATIONS OF DESIGN	9 Hours

UI vs. UX Design - Core Stages of Design Thinking - Divergent and Convergent Thinking - Brainstorming and Game storming - Observational Empathy

FOUNDATIONS OF UI DESIGN	9 Hours

Visual and UI Principles - UI Elements and Patterns - Interaction Behaviours and Principles – Branding - Style Guides

FOUNDATIONS OF UX DESIGN	9 Hours

Introduction to User Experience - Why You Should Care about User Experience - Understanding User Experience - Defining the UX Design Process and its Methodology - Research in User Experience Design - Tools and Method used for Research - User Needs and its Goals - Know about Business Goals

RESEARCH, DESIGNING, IDEATING, & INFORMATION ARCHITECTURE	9 Hours

Identifying and Writing Problem Statements - Identifying Appropriate Research Methods - Creating Personas - Solution Ideation - Creating User Stories - Creating Scenarios - Flow Diagrams - Flow Mapping - Information Architecture

WIREFRAMING, PROTOTYPING AND TESTING	9 Hours

Sketching Principles - Sketching Red Routes - Responsive Design – Wireframing - Creating Wireflows - Building a Prototype - Building High-Fidelity Mockups - Designing Efficiently with Tools - Interaction Patterns - Conducting Usability Tests - Other Evaluative User Research Methods - Synthesizing Test Findings - Prototype Iteration
Theory: 45 **Tutorial: -** **Total Hours: 45 Hrs**

BRIDGE COURSES (BC)

TERM I

P20CAB1001	FUNDAMENTALS OF COMPUTING	L	T	P	J	C
		3	0	0	0	3

Course Outcomes

After successful completion of this course, the students should be able to

CO1: Develop a C program for simple applications.
CO2: Formulate algorithm for simple problems.
CO3: Analyze different data types and arrays
CO4: Perform simple search and sort.
CO5: Use Programming Language to solve problems.

Pre–requisite : Nil

COURSE ASSESSMENT METHODS
DIRECT
1.Continuous Assessment Test I, II 2. Assignment 3. Demonstration etc 4. End Semester Examination
INDIRECT
1. Course-end survey

INTRODUCTION — **9 Hours**

Introduction to Computers – Computer Software – Computer Networks and Internet - Need for Logical Thinking – Problem Formulation and Development of Simple Programs - Pseudo Code - Flow Chart and Algorithms.

C PROGRAMMING BASICS — **9 Hours**

Introduction to C programming – Fundamentals – Structure of a C program – Compilation and Linking Processes - Constants, Variables – Data Types – Expressions - Operators –Decision Making and Branching – Looping Statements – Solving Simple Scientific and Statistical Problems.

ARRAYS AND STRINGS — **9 Hours**

Arrays – Initialization – Declaration – One Dimensional and Two-Dimensional Arrays – Strings- String Operations – String Arrays - Simple Programs- Sorting- Searching – Matrix Operations.

POINTERS — **9 Hours**

Macros - Storage Classes –Basic Concepts of Pointers– Pointer Arithmetic - Example Problems - Basic File Operations

FUNCTIONS AND USER DEFINED DATA TYPES — **9 Hours**

Function – Definition of Function – Declaration of Function – Pass by Value – Pass by Reference – Recursion –Enumerators – Structures – Unions

Theory: 45 **Tutorial: -** **Total Hours: 45 Hrs**

P20CAB1002	COMPUTER ORGANIZATION & OPERATING SYSTEMS	L	T	P	J	C
		3	0	0	0	3

Course Outcomes

After successful completion of this course, the students should be able to

CO1: Understand the basic structure of a digital computer.
CO2: Establish a deep understanding of arithmetic operations of binary number system.
CO3: Discuss about organization of the control unit, arithmetic and logical unit, memory unit and the I/O unit.
CO4: Understand the basic functions of operating system.
CO5: Establish a thorough understanding about operating system services and system calls.

Pre–requisite : Nil

COURSE ASSESSMENT METHODS
DIRECT
1.Continuous Assessment Test I, II 2. Assignment 3. Demonstration etc 4. End Semester Examination
INDIRECT
1. Course-end survey

BASIC STRUCTURE OF COMPUTERS	9 Hours

Computer Types, Functional Units, Basic Operational Concepts, Bus, Structures, Software, Performance, Multiprocessors and Multi Computers.

REGISTER TRANSFER LANGUAGE AND MICRO OPERATIONS	9 Hours

Register Transfer Language, Register Transfer Bus and Memory Transfers, Arithmetic Micro Operations, Logic Micro Operations, Shift Micro Operations, Arithmetic Logic Shift Unit, Instruction Codes, Computer Registers Computer Instructions - Instruction Cycle. Memory - Reference Instructions, Input - Output and Interrupt, STACK Organization, Instruction Formats, Addressing Modes, DATA Transfer and Manipulation, Program Control, Reduced Instruction Set Computer.

MICRO PROGRAMMED CONTROL AND TYPES OF MEMORY	9 Hours

Control Memory, Address Sequencing, Microprogram Examples, Design of Control Unit, Hard Wired Control, Microprogrammed Control . Basic Concepts of Semiconductor RAM Memories, Read-Only Memories, Cache Memories Performance Considerations, Virtual Memories secondary Storage, Introduction to RAID.

INPUT-OUTPUT ORGANIZATION	9 Hours

Peripheral Devices, Input-Output Interface, Asynchronous Data Transfer Modes, Priority Interrupt, Direct Memory Access, Input-Output Processor (IOP), Serial Communication; Introduction to

Peripheral Components, Interconnect (PCI) Bus, Introduction to Standard Serial Communication Protocols like RS232, USB, IEEE1394.

OPERATING SYSTEMS OVERVIEW	**9 Hours**

Overview of Computer Operating Systems Functions, Protection and Security, Distributed Systems, Special Purpose Systems, Operating Systems Structures-Operating System Services and Systems Calls, System Programs, Operating System Generation.

Theory: 45	**Tutorial: -**	**Total Hours: 45 Hrs**

P20CAB1003	BASIC DATA STRUCTURES	L	T	P	J	C
		3	0	0	0	3

Course Outcomes

After successful completion of this course, the students should be able to

CO1: Demonstrate basic concepts of Data Structures.
CO2: Implement linear Data Structure for an application.
CO3: Design and implement tree Data Structures.
CO4:Apply searching and sorting algorithms for a given problem.
CO5: Choose appropriate Data Structure and implement a given application.

Pre–requisite : Nil

COURSE ASSESSMENT METHODS
DIRECT
1.Continuous Assessment Test I, II 2. Assignment 3. Demonstration etc 4. End Semester Examination
INDIRECT
1.Course-end survey

INTRODUCTION	**9 Hours**
Data Types – Abstract Data Types (ADTs) – Algorithm and Problem Solving – Data Structure: Array - Data Structure Operations - Algorithm: Complexity – Time, Space Tradeoff	

STACK & QUEUE	**9 Hours**
Stack: Basic Operations, Implementation of Stacks – Applications: Infix to Postfix Conversion-Expression Evaluation – Queue: Basic Operations, Implementation of Queues – Applications.	

LINKED LISTS	**9 Hours**
Linked List – Linked List Implementation – Singly-Linked Lists - Doubly-Linked Lists – Circular Linked Lists – Applications.	

TREES	**9 Hours**
Trees: Preliminaries - Tree Traversals – Binary Trees – Complete Binary Tree - Expression Trees – Binary Search Trees.	

SORTING & SEARCHING	**9 Hours**
Search Algorithms – Linear Search – Binary Search. Sorting Algorithm - Quick Sort, Merge Sort.	

Theory: 45	**Tutorial: -**	**Total Hours: 45 Hrs**

P20CAB1004	DATABASE MANAGEMENT SYSTEMS	L	T	P	J	C
		3	0	0	0	3

Course Outcomes

After successful completion of this course, the students should be able to

CO1: Understand the basic concepts and the applications of database systems.
CO2: Familiarize the basics of SQL and construct queries using SQL.
CO3: Understand the relational database design principles.
CO4: Know the basic issues of transaction processing and concurrency control.
CO5: Understand the database storage structures and access techniques.

Prerequisite: Nil

COURSE ASSESSMENT METHODS
DIRECT
1. Continuous Assessment Test I, II 2. Assignment 3. Demonstration etc 4. End Semester Examination
INDIRECT
1.Course-end survey

INTRODUCTION	**9 Hours**
Data base System Applications, Purpose of Database Systems, View of Data – Data Abstraction – Instances and Schemas – Data Models – Relational Model – Other Models – Database Languages – Database Users and Administrator – Transaction Management – Database Architecture – Storage Manager – Query Processor	
DATABASE DESIGN	**9 Hours**
Database design and ER diagrams – ER Model - Entities, Attributes and Entity sets – Relationships and Relationship sets – ER Design Issues – Conceptual Design - Introduction to the Relational Model – Structure – Database Schema - Keys – Schema Diagrams - Overview of SQL Query Language – Basic Structure of SQL Queries.	
IMPLEMENTATION TECHNIQUES	**9 Hours**
Overview of Physical Storage Media – RAID – File Organization – Organization of Records in Files - Indexing and Hashing – Ordered Indices – B+ tree Index Files – Static Hashing – Dynamic Hashing - Query Processing - Overview – Catalog Information for Cost Estimation – Query Optimization.	
TRANSACTION MANAGEMENT	**9 Hours**

Transaction Concept- Transaction State- Implementation of Atomicity and Durability – Concurrent – Executions – Serializability- Recoverability – Implementation of Isolation – Testing for serializability- Lock Based Protocols – Timestamp Based Protocols - Validation Based Protocols – Multiple Granularity - Remote Backup systems.	
DATABASE APPLICATIONS	**9 Hours**
Client – Server database - Two tier architecture – Three tier architecture – Front end & Back end tools – Design & Implementation – Database Connectivity - Database Access for applications Programs – Web Databases – Open source databases – Cloud databases.	
Theory: 45 Hours **Tutorial: -** **Total : 45 Hours**

P20CAB1005	C PROGRAMMING AND DATA STRUCTURES LAB	L	T	P	J	C
		0	0	4	0	2

Course Outcomes

After successful completion of this course, the students should be able to

CO1: Demonstrate the concepts of structured programming language.

CO2: Implement linear and non-linear data structures.

CO3: Develop skills in design and implementation of data structures and their applications.

CO4: Implement the different searching and sorting techniques.

Pre–requisite : Nil

COURSE ASSESSMENT METHODS
DIRECT
1. Pre/Post - Experiment Test/Viva; Experimental Report for each Experiment (lab Component) 2. Model Examination (lab component) 3. End Semester Examination (lab components)
INDIRECT
1. Course-end survey

LIST OF EXPERIMENTS:

1.Implementation of simple programs in C using decision making & looping statements.
2.Implementation of simple programs in C using arrays.
3.Implementation of simple programs in C using functions.
4.Implementation of simple programs in C using structures.
5.Implementation of simple programs in C using pointers.
6.Implementation of stack using arrays.
7.Implementation of queue using arrays.
8.Implementation of singly linked list.
9.Implementation of doubly linked list.
10.Implementation of tree traversals.
11.Implementation of sorting algorithms.
12.Implementation of linear & binary search algorithms.

Total Hours: 60 Hrs

P20CAB1006	DATABASE MANAGEMENT SYSTEMS LAB	L	T	P	J	C
		0	0	4	0	2

Course Outcomes

After successful completion of this course, the students should be able to

CO1: Familiarize the Data Definition and Data Manipulation Language.
CO2:Populate and query a database using TCL/DCL commands.
CO3:Construct simple and advanced database queries using Structured Query Language (SQL).
CO4:Improve the SQL skills using aggregate and set functions.
CO5:Glance about user management.

Pre–requisite : Nil

COURSE ASSESSMENT METHODS
DIRECT
1. Pre/Post - Experiment Test/Viva; Experimental Report for each Experiment (lab Component) 2. Model Examination (lab component) 3. End Semester Examination (lab components)
INDIRECT
1.Course-end survey

LIST OF EXPERIMENTS:

1.Perform DDL with various integrity constraints.
2.Practice with DML commands.
3.Execute DCL and TCL commands.
4.Retrieve data from tables using different clauses.
5.Execute Aggregate Functions.
6.Practice the Set Operations.
7.SQL Querying on Multiple Tables.
8.Execute Sub Queries.
9.Create Database Objects.
10.SQL User Management

Total Hours: 60 Hrs

BRIDGE COURSES (BC)

TERM II

P20CAB1007	MATHEMATICS FOR COMPUTER APPLICATIONS	L	T	P	J	C
		3	1	0	0	4

Course Outcomes

After successful completion of this course, the students should be able to

CO1: Analyze the given propositions and finding results using mathematical logic operators.
CO2: Identify the different types of grammars and able to generate various languages.
CO3: Find eigen values and eigen vectors of real symmetric and non symmetric matrices.
CO4 : Solve the system of linear homogeneous as well as non homogeneous equations and analyze the consistency of the system of linear equations.
CO5 : Find the solution of non linear algebraic and transcendental equations by numerical methods.
CO6:Predict the interpolated values using difference formulae

Pre–requisite : Nil

COURSE ASSESSMENT METHODS
DIRECT
1.Continuous Assessment Test I, II 2. Assignment 3. Demonstration etc 4. End Semester Examination
INDIRECT
1.Course-end survey

MATHEMATICAL LOGIC	**10 Hours**

Propositions and Logical Operators – Truth Table – Equivalence and Implication – Basic Laws – Normal Forms – Principal Conjunctive and Disjunctive Normal Forms – Rules of Inference – Arguments –Validity of Arguments – Proofs in Propositional Calculus – Predicate Calculus – Validity of Arguments

FORMAL LANGUAGES	**9 Hours**

Languages and Grammars – Phrase Structure Grammar – Classification of Grammars – Languages Generated by Grammars – Pumping Lemma for Regular Languages.

MATRICES	**9 Hours**

Characteristic Equation – Eigen Values and Eigenvectors of a Real Matrix – Properties of Eigen Values and Eigenvectors (Without Proof) – Eigen Values of a Matrix by Power Method – Cayley Hamilton Theorem

SOLUTION OF A SYSTEM OF LINEAR EQUATIONS	**8 Hours**

Rank of a Matrix – Consistency of a System of Linear Equations – Rouche's Theorem – Solution of Linear System of Equations by Gauss Elimination Method and Gauss Jordan Method – Gauss Seidel Method –Matrix Inversion by Gauss Jordan Method

NUMERICAL SOLUTION OF ALGEBRAIC AND TRANSCENDENTAL EQUATIONS	**5 Hours**

Solution of Nonlinear Equations – Method of False Position – Fixed Point Iteration Method – Newton Raphson Method for a Single Equation.

INTERPOLATION	**4 Hours**

Interpolation: Newton's Forward and Backward Difference Formulas – Lagrange's Interpolation – Inverse Interpolation

Theory: 45 **Tutorial: 15** **Total Hours: 60 Hrs**

P20CAB1008	PYTHON PROGRAMMING	L	T	P	J	C
		3	0	0	0	3

Course Outcomes

After successful completion of this course, the students should be able to

CO1: Make use of python programming elements to solve and debug simple logical problems.
CO2: Experiment with the various control statements in Python.
CO3: Develop Python programs using functions and strings.
CO4: Analyze a problem and use appropriate data structures to solve it.
CO5: Develop python programs to implement various file operations and exception handling.

Pre–requisite : Nil

COURSE ASSESSMENT METHODS
DIRECT
1.Continuous Assessment Test I, II 2. Assignment 3. Demonstration etc 4. End Semester Examination
INDIRECT
1.Course-end survey

BASICS OF PYTHON PROGRAMMING	**5 Hours**
Introduction-Python Interpreter-Interactive and script mode-Values and types, operators, expressions, statements, precedence of operators, multiple assignments, comments.	

CONTROL STATEMENTS AND FUNCTIONS	**10 Hours**
Conditional (if), alternative (if-else), chained conditional (if-elif-else)-Iteration-while, for, break, continue, pass – Functions-Introduction, inbuilt functions, user defined functions, passing parameters, return values, recursion, Lambda functions.	

DATA STRUCTURES: STRINGS, LISTS AND SETS	**10 Hours**
Strings-String slices, immutability, string methods and operations -Lists-creating lists, list operations, list methods, mutability, aliasing, list and strings, list and functions-list processing-list comprehension, Sets-creating sets, set operations.	

DATA STRUCTURES: TUPLES, DICTIONARIES	**10 Hours**
Tuples-Tuple assignment, Operations on Tuples, lists and tuples, Tuple as return value- Dictionaries-operations and methods, Nested Dictionaries.	

FILES, MODULES, PACKAGES	**10 Hours**
Files and Exception-Text files, reading and writing files, format Operator-Modules-Python Modules-Creating own Python Modules-packages, Introduction to exception handling.	
Theory: 45 **Tutorial: -** **Total Hours: 45 Hrs**

P20CAB1009	DIGITAL FUNDAMENTALS	L	T	P	J	C
		3	0	0	0	3

Course Outcomes

After successful completion of this course, the students should be able to

CO1: Identify the various number systems, demonstrate the knowledge in arithmetic operations and codes.
CO2: Identify the various types of gates and use them circuit building and minimization.
CO3: Combinational circuit design and perform arithmetic operations.
CO4: Sequential circuit design and study of its applications
CO5: Understand the basic building blocks of a Central Processing Unit and various architectures.

Pre–requisite : Nil

COURSE ASSESSMENT METHODS
DIRECT
1.Continuous Assessment Test I, II 2. Assignment 3. Demonstration etc 4. End Semester Examination
INDIRECT
1.Course-end survey

INTRODUCTION	9 Hours

Number Systems – Decimal, Binary, Octal and Hexadecimal Systems – Conversion from one system to another – Binary Addition, Subtraction, Multiplication and Division – Binary Codes– 8421, 2421, Excess-3, Gray, BCD – Alphanumeric Codes –Error Detection Codes.

GATES & CIRCUIT MINIMIZATION	9 Hours

Basic Logic Gates – Universal Logic – Boolean Laws and Theorems – Boolean Expressions – Sum of Products – Product of Sums – Simplification of Boolean Expressions –Karnaugh Map Method (up to 4 Variables) – Implementation of Boolean Expressions using Gate Networks.

COMBINATIONAL CIRCUITS AND APPLICATION	9 Hours

Combinational Circuits – Multiplexers – Demultiplexers – Decoders – Encoders – Arithmetic Building Blocks – Half and Full Adders – Half and Full Subtractors – Parallel adder –2's Complement Adder – Subtractor – BCD Adder.

SEQUENTIAL CIRCUITS AND APPLICATION	9 Hours

Sequential Circuits – Flip Flops – RS, Clocked RS, D, JK, T and Master-Slave Flip Flops –Shift Register – Counters – Asynchronous, MOD-n and Synchronous Counters – BCD Counter –Ring Counter.

CENTRAL PROCESSING UNIT	9 Hours
Central Processing Unit: General Register Organization – Stack Organization – Instruction Formats – Addressing Modes – Data Transfer and Manipulation – Program Control – Reduced Instruction Set Computer – CISC characteristics – RISC Characteristics.	
Theory: 45 **Tutorial: -** **Total Hours: 45 Hrs.**

P20CAB1010	PYTHON LAB	L	T	P	C
		0	0	4	2

Course Outcomes

After successful completion of this course, the students should be able to

CO1: Understand the problem solving approaches.
CO2: Learn the basic programming constructs in Python.
CO3: To provide Python based solution to real world problems.
CO4: Use Python data structures - lists, tuples, dictionaries.
CO5: To do input/output with files in Python.

Pre–requisite : Nil

COURSE ASSESSMENT METHODS
DIRECT
1.Pre/Post - Experiment Test/Viva; Experimental Report for each Experiment 2.Model Examination 3.End Semester Examination
INDIRECT
1.Course-end survey

LIST OF EXPERIMENTS:

1. Identification and solving of simple real life or scientific or technical problems and developing. flow charts for the same.
2. Python programming using simple statements and expressions.
3. Implement various control statements in python.
4. Demonstrate the user define functions in python.
5. Develop python programs to perform various string operations like concatenation, slicing, Indexing.
6. Implement various real time and technical applications using Lists and Tuples.
7. Implement various real time and technical applications using dictionary and set in python.
8. Implement python program to perform file operations.
9. Demonstrate Exception handling.
10. Write python programs using Numpy and Pandas in Python.

Total: 60 hours

ONE CREDIT COURSES

SYLLABUS

P20CAC0201	AGILE METHODOLOGY

Course Outcomes

After successful completion of this course, the students should be able to

CO 1: Understand and apply agile principles while developing software.
CO 2: Establish a healthy collaboration between development teams.

AGILE PROCESS

Beginning Agility – Agile Manifesto and Principles – Agile Success Factors– Delivering what users want – Agile Planning – Caring about Quality – Collaboration – Listening to Feedback – Combining Scrum with XP – Case Studies.

Theory: 15 Hours **Tutorial: -** **Total: 15 Hours**

REFERENCES

1. Rachel Davies & Liz Sedley, "Agile Coaching", The Pragmatic Bookshelf, 2012.
2. Henrik Kniberg, "Scrum and XP from the Trenches–How we do Scrum", InfoQ Enterprise Software Development Series, 2007.

P20CAC0202	INTRODUCTION TO ETHICAL HACKING

Course Outcomes

After successful completion of this course, the students should be able to

CO 1: Defend a computer and network against a variety of security attacks using a number of hands–on techniques.

CO 2: Practice and use safe techniques on the World Wide Web and develop security policies.

INTRODUCTION

Introduction to Ethical Hacking – Hacking Operating System – Hacking Network – Website Hacking – Foot Printing – Checking the Status of Ports.

Phishing – Password – Privacy – Denial of Service Attacks – Microsoft Operating System Vulnerabilities – Linux Operating System Vulnerabilities – Viruses and Worms – Network Security Devices.

Theory: 15 Hours **Tutorial: -** **Total: 15 Hours**

REFERENCES

1. Michael T. Simpson, "Ethical Hacking and Network Defense", Cengage Learning India Private Limited, New Delhi, 2010.
2. Ankit Fadia, "An Unofficial Guide to Ethical Hacking", Macmillan India Ltd., New Delhi, 2010.

P20CAC0203	SOFT SKILLS

Course Outcomes

After successful completion of this course, the students should be able to

CO 1: Perform well in a team and positively resolve conflict in timely manner.
CO 2: Set realistic goals and manage stress well.

SELF ANALYSIS & INTERPERSONAL SKILLS

Self Analysis: SWOT Analysis – Who Am I – Attributes – Importance of Self Confidence– Self Esteem. Attitude: Factors Influencing Attitude – Challenges – Lessons from Attitude – Motivation: Factors of Motivation – Self Talk – Intrinsic and Extrinsic Motivators. Goal Setting: Wish List – Smart Goals – Blue Print for Success – Short Term – Long Term – Life Time Goals.

Interpersonal Skills: Understanding the Relationship between Leadership Networking and Team Work – Necessity of Team Work – Stress Management: Causes of Stress and its Impact – How to Manage Distress – Understanding the Circle of Control – Stress Busters. Decision Making: Importance and Necessity of Decision Making – Process of Decision Making – Practical Way of Decision Making – Weighing Positives and Negatives.

Theory: 15 Hours **Tutorial: -** **Total: 15 Hours**

REFERENCES

1. Barun K. Mitra, "Personality Development and Soft Skills", Oxford Publisher, 2011.
2. Nitin Bhatnagar, "Effective Communication and Soft Skills", Pearson Education India 2012.

P20CAC0204	TECHNICAL WRITING

Course Outcomes

After successful completion of this course, the students should be able to

CO 1: Express themselves in different kind of writing from creative to critical and factual writing.
CO 2: Identify and critique effective technical writing techniques and practices.

WRITING TECHNIQUES

Techniques of Writing – Emails – Minutes – Reports of different Kinds – Annual Report – Status Report – Survey Report – Proposals – Memorandums – Presentations – Interviews – Profile of Institutions – Speeches – Responding to Enquiries – Complaints – Resumes – Applications – Summarizing – Strategies for Writing.

Theory: 15 Hours **Tutorial: -** **Total: 15 Hours**

REFERENCES

1. Sharan J Gerson & Steven M Gerson, "Technical Writing: Process and Product", 8th Edition, Pearson Education, New Delhi, 2013.

P20CAC0205	HUMAN EXCELLENCE – PROFESSIONAL VALUES

Course Outcomes

After successful completion of this course, the students should be able to

CO 1: Acquire knowledge through personality development.
CO 2: Demonstrate skills of self–control.

INTRODUCTION,LEADERSHIP & EMPOWERMENT OF MIND

Human Excellence: Introduction – Objective – Personal Values – Importance – **Life:** Self – Society – Nature – Yoga – Purpose and Philosophy of Life – **Personality Concepts**: Introspection – Six Temperaments and their Maneuvering – Analysis of Thought – Moralizing of Desire – Neutralization of Anger – Eradication of Worries – Training: Stress Management – Time Management.

Leadership Traits: Carrying Oneself – Factors of Leadership – Principles of Leadership – **Self Control**: Importance – Techniques to Development Oneself – Ten Commandments of Self–Development – Self–Control Technique for Teenagers – Training: Method of Self Control – **Empowerment of Mind**: Body, Soul and Mind – Bio Magnetism – Genetic Centre – Mind: Origin and its Ten Stages – Simplified Physical Exercises – **KayaKalpa Yoga**: Aim – Kayakalpa Philosophy – Importance of Kayakalpa Training – Training: Kaya Kalpa Yoga – **Meditation**: Introduction of Meditation – Benefits of Meditation – Training: Agna Meditation – Santhi Meditation.

Theory: 15 Hours **Tutorial: -** **Total: 15 Hours**

P20CAC0206	DATA ANALYTICS

Course Outcomes

After successful completion of this course, the students should be able to

CO1: Analyze and interpret data using an ethically responsible approach.
CO2: Use appropriate models of analysis, assess the quality of input, derive insight from results, and investigate potential issues.
CO3: Interpret data findings effectively to any audience, orally, visually and in written formats

BASICS OF DATA ANALYTICS

Basic Analysis Techniques-Statistical Hypothesis Generation and Testing-Chi-Square Test – T – TestAnalysis of Variance-Correlation Analysis-Maximum Likelihood Test-Practice And Analysis With R-Data Analysis Techniques-Regression Analysis-Classification Techniques—Clustering-Association Rules Analysis-Practice and Analysis With R

Theory: 15 Hours **Tutorial: -** **Total: 15 Hours**
